

Colorado Department of Health Care Policy and Financing Preferred Drug List (PDL)

Effective July 1, 2020

PA Forms: Available online at https://www.colorado.gov/hcpf/pharmacy-resources

<u>PA Requests:</u> Colorado Pharmacy Call Center Phone Number: 800-424-5725 | Colorado Pharmacy Call Center Fax Number: 800-424-5881 The PDL applies to Medicaid fee-for-service members. It does not apply to members enrolled in Rocky Mountain Health HMO or Denver Health Medicaid Choice.

Initiation of pharmaceutical product subject to Prior Authorization:

Please note that starting the requested drug, including a non-preferred drug, prior to a PA request being reviewed and approved, through either inpatient use, by using office "samples", or by any other means, does not necessitate Medicaid approval of the PA request.

Health First Colorado, at 25.5-5-501, requires the generic of a brand name drug be prescribed if the generic is therapeutically equivalent to the brand name drug. Exceptions to this rule are: 1) If the brand name drug is more cost effective than the generic as determined by the Department, 2) If the patient has been stabilized on a brand name drug and the prescriber believes that transition to a generic would disrupt care, and 3) If the drug is being used for treatment of mental illness, cancer, epilepsy, or human immunodeficient virus and acquired immune deficiency syndrome.

Brand Name Required = BNR, Prior Authorization = PA, AutoPA = authorization can be automated at the point of sale transaction if criteria is met Preferred drug list applies only to prescription (RX) products, unless specified

Preferred Agents	Non-preferred Agents	Prior Authorization Criteria
		(All Non-preferred products will be approved for one year unless otherwise stated.)
		I. Analgesics
	Therapeutic Drug Class: NON-OP	IOID ANALGESIA AGENTS - Oral - Effective 7/1/2020
No PA Required	PA Required	
		Non-preferred oral non-opioid analgesic agents may be approved if member meets all of the
Duloxetine capsule (generic	CYMBALTA (duloxetine)	following criteria:
Cymbalta)		Member has trialed and failed duloxetine (20mg, 30mg, or 60mg) AND has trialed and
	DRIZALMA (duloxetine DR) sprinkle	failed gabapentin OR pregabalin capsule (Failure is defined as lack of efficacy with 8 week
Gabapentin capsule, tablet, solution	capsules	trial, allergy, intolerable side effects, or significant drug-drug interaction)
	Duloxetine capsule (generic Irenka)	Prior authorization will be required for Lyrica (pregabalin) capsule dosages > 600mg per day
Pregabalin capsule		(maximum of 3 capsules daily) and gabapentin dosages > 3600mg per day.
	GRALISE (gabapentin ER)	

	LYRICA (pregabalin) capsule, solution, CR tablet	
	NEURONTIN (gabapentin) capsule, tablet, solution	
	Pregabalin solution	
	SAVELLA (milnacipran) tablet	
Th	nerapeutic Drug Class: NON-OPIC	OID ANALGESIA AGENTS - Topical - Effective 7/1/2020
No PA Required	PA Required	Non-preferred topical products require a trial/failure with an adequate 8-week trial of gabapentin
Lidocaine patch	LIDODERM (lidocaine) patch	AND pregabalin AND duloxetine AND lidocaine patch. Failure is defined as lack of efficacy with an 8 week trial, allergy, intolerable side effects, or significant drug-drug interaction.
	ZTLIDO (lidocaine) topical system	Prior authorization will be required for lidocaine patch quantities exceeding 90 patches per 30 days (maximum of 3 patches daily).
Therapeutic	Drug Class: NON-STEROIDAL	ANTI-INFLAMMATORIES (NSAIDS) - Oral - Effective 1/1/2020
No PA Required	PA Required	211 (11 21 22 21 21 21 21 21 21 21 21 21 21 2
Celecoxib capsule	ARTHROTEC (diclofenac sodium/misoprostol) tablet	Non-preferred oral agents may be approved for members who have trialed and failed four preferred agents. (Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drugdrug interaction.)
Diclofenac potassium tablet	CELEBREX (celecoxib) capsule	Duexis (ibuprofen/famotidine) or Vimovo (naproxen/esomeprazole) may be approved if the member
Diclofenac sodium EC/DR tablet	DAYPRO (oxaprozin) caplet	meets the following criteria: Trial and failure of all preferred NSAIDs at maximally tolerated doses AND Trial and failure of three preferred proton pump inhibitors in combination with NSAID within
Ibuprofen suspension, tablet (RX)	Diclofenac sodium ER tablets	the last 6 months AND • Have a documented history of gastrointestinal bleeding
Indomethacin capsule, ER	Diclofenac sodium/misoprostol tablet	(Failure is defined as: lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions)
capsule	Diflunisal tablet	
Ketorolac tablet**	DUEXIS (ibuprofen/famotidine) tablet	**Ketorolac tablets quantity limit: 5 days of therapy for every 30 days Tablets:20 tablets for 30 days
Meloxicam tablet	Etodolac capsule, IR and ER tablet	
Nabumetone tablet	FELDENE (piroxicam) capsule	
Naproxen EC, DR/ER, suspension, tablet (RX)	Fenoprofen capsule, tablet	
	Flurbiprofen tablet	
	INDOCIN (indomethacin) susp	

	Ketoprofen IR, ER capsule	
	Meclofenamate capsule	
	Mefenamic acid capsule	
	NALFON (fenoprofen) capsule, tablet	
	NAPRELAN (naproxen CR) tablet	
	Naproxen sodium CR, ER, IR tablet	
	Oxaprozin tablet	
	Piroxicam capsule	
	QMIIZ (meloxicam) ODT	
	TIVORBEX (indomethacin) capsule	
	Tolmetin tablet, capsule	
	VIMOVO (naproxen/esomeprazole) tablet	
	VIVLODEX (meloxicam) capsule	
	ZIPSOR (diclofenac) capsule	
	ZORVOLEX (diclofenac) capsule	
Therapeutic	Drug Class: NON-STEROIDAL A	NTI-INFLAMMATORIES (NSAIDS) - Non-Oral - Effective 1/1/2020
No PA Required	PA Required	Non-preferred topical agents may be approved for members who have trialed and failed one preferred agent. Failure is defined as lack of efficacy with 14 day trial, allergy, intolerable side effects, or
Diclofenac 1.5% topical	D: 1.6 1.20/ / : 1 / 1 /	significant drug drug interaction

Diclofenac 1.5% topical solution

Diclofenac 1.3% topical patch (generic Flector)

significant drug-drug interaction.

VOLTAREN (diclofenac) 1% gel

FLECTOR (diclofenac) 1.3% topical

Sprix (**ketorolac**) intranasal will be approved if the member meets the following criteria:

Diclofenac sodium 1% (generic Voltaren) gel

patch

- Unable to tolerate, swallow or absorb oral NSAIDs **OR**
- PENNSAID (diclofenac solution) 2% Pump, 2% Solution Packet
- Trial and failure of three preferred oral or topical NSAID agents (failure is defined as: lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions) Quantity limit: 5-single day nasal spray bottles per 30 days

SPRIX (ketorolac) nasal spray

Flector (diclofenac) patch quantity limit: 2 patches per day

Solaraze (diclofenac sodium) gel prior authorization criteria can be found on the Appendix P.

Opioid Utilization Policy (long-acting and short-acting opioids):

It is highly encouraged that the healthcare team utilize the Prescription Drug Monitoring Program (PDMP) to aid in ensuring safe and efficacious therapy for members using controlled substances.

Total Morphine Milligram Equivalent Policy Effective 10/1/17:

- The maximum allowable morphine milligram equivalent (MME) is 200 MME. Prescriptions for short-acting (SA) and long-acting (LA) opioids are cumulatively included in this calculation. The prescription that exceeds the cumulative MME limit of 200 MME for a member will require prior authorization and may require a provider to provider telephone consultation with the pain management physician (free of charge and provided by Health First Colorado).
- Prior authorization will be granted to allow for tapering
- Prior authorization for 1 year will be granted for diagnosis of sickle cell anemia
- Prior authorization for 1 year will be granted for admission to or diagnosis of hospice or end of life care
- Prior authorization for 1 year will be granted for pain associated with cancer

MME calculation is conducted using conversion factors from the following website: http://agencymeddirectors.wa.gov/Calculator/DoseCalculator.htm

Only one long-acting opioid agent (including different strengths) and one short-acting opioid agent (including different strengths) will be considered for a prior authorization.

Medicaid provides guidance on the treatment of pain, including tapering, on our webpage under the heading Pain Management Resources and Opioid Use at: https://www.colorado.gov/pacific/hcpf/pain-management-resources-and-opioid-use

Opioid Naïve Policy Effective 8/1/17 (*Update effective 11/27/19 in Italics*):

Members who have not filled a prescription for an opioid within the past 180 days will be identified as "opioid treatment naïve" and have the following limitations placed on the initial prescription(s):

- The prescription is limited to short-acting opioid agents or Butrans (buprenorphine) 5mcg patch. Use of other long-acting opioid agents will require prior authorization approval for members identified as opioid treatment naïve.
- The days supply of the first, second, and third prescription for an opioid will be limited to 7 days, the quantity will be limited to 8 dosage forms per day (tablets, capsules), maximum #56 tablets/capsules for a 7 day supply
- The fourth prescription for an opioid will require prior authorization, filling further opioid prescriptions may require a clinical pharmacist review or provider to provider telephone consultation with a pain management physician (free of charge and provided by Health First Colorado).
- If a member has had an opioid prescription filled within the past 180 days, then this policy would not apply to that member and other opioid policies would apply as applicable.

Dental Prescriptions Opioid Policy Effective 11/15/18 (implemented in the claims system 01/07/19):

Members who receive an opioid prescribed by a dental provider will be subject to day supply limits and quantity per day limits for short acting opioids.

- The prescription is limited to short-acting opioid agents only. Use of long-acting opioid agents and short acting fentanyl agents will require prior authorization approval for members' prescriptions written by a dental provider.
- The days supply of the first, second, and third prescription for an opioid will be limited to 4 days, the quantity will be limited to 6 dosage forms per day (tablets, capsules), maximum #24 tablets/capsules for a 4 day supply
- The fourth prescription for an opioid will require prior authorization. A prior authorization for the fourth fill may be approved for up to a 7 day supply and the quantity will be limited to 8 dosage forms per day (#56 tablets/capsules) for members with any of the following diagnoses/undergoing any of the following procedures:
 - o Traumatic oro-facial tissue injury with major mandibular/maxillary surgical procedures
 - o Severe cellulitis of facial planes
 - o Severely impacted teeth with facial space infection necessitating surgical management
- Other potential exemptions that exceed the first 3 fill limits (day supply and quantity) may be evaluated with a provider to provider telephone consult with a pain management specialist (free of charge and provided by Health First Colorado)

If a member has had an opioid prescription prescribed by a non-dental provider, then this policy would not apply to that member and other opioid policies would apply as applicable. Dental prescriptions do not impact the opioid treatment naïve policy, but the prescriptions will be counted towards the Morphine Milligram Equivalent (MME) daily dose.

Opioid and Benzodiazepine Combination Effective 9/15/19:

Prior authorization will be required for members receiving long-term therapy with an opioid medication who are newly started on a benzodiazepine medication <u>OR</u> for members receiving long-term therapy with a benzodiazepine medication who are newly started on an opioid medication. Prior authorization may be approved if meeting the following:

- The member discontinued or is no longer taking either the opioid or benzodiazepine medication and will not be using these in combination **OR**
- The member will not be taking the prescribed opioid and benzodiazepine medications at the same time based on prescribed dosing interval (such as prn administration) for the regimen AND the prescriber attests that the member has received appropriate counseling* regarding the risks associated with combining opioid and benzodiazepine medications including increased risk for sedation, respiratory depression, overdose, and overdose-related death and counseling regarding the FDA Boxed Warning for combining these medications **OR**
- The prescriber has evaluated the regimen and attests that it is appropriate for the member to continue use of the concomitant opioid and benzodiazepine medication regimen as prescribed AND the prescriber attests that the member has received appropriate counseling* regarding the risks associated with combining opioid and benzodiazepine medications including increased risk for sedation, respiratory depression, overdose, and overdose-related death and counseling regarding the FDA Boxed Warning for combining these medications **OR**
- Prior authorization may be approved for members receiving palliative or hospice care OR
- For benzodiazepine prior authorizations, approval may be granted if the benzodiazepine is being prescribed for seizure disorder or convulsions.

Opioid and Quetiapine Combination Effective 9/15/19:

Pharmacy claims for members receiving opioid and quetiapine medications in combination will require entry of point-of-sale DUR service codes (Reason for Service, Professional Service, Result of Service) for override of drug-drug interaction (DD) related to risk of increased sedation from concomitant use of this drug combination.

	Therapeutic Drug Class: OPIOIDS, Short Acting - Effective 7/1/2020			
No PA Required*	PA Required			
(if criteria and quantity limit is met)	Acetaminophen / codeine elixir	*Preferred codeine and tramadol products do not require prior authorization for adult members (18 years of age or greater) if meeting all other opioid policy criteria. Preferred codeine or tramadol products prescribed for members < 18 years of age must meet the following criteria:		
Acetaminophen/codeine	APADAZ (benzhydrocodone/			
tablets*	acetaminophen)	• Preferred tramadol and tramadol-containing products may be approved for members < 18 years of age if meeting the following:		
Hydrocodone/acetaminophen	ASCOMP WITH CODEINE (codeine/	○ Member is \geq 12 years of age AND		
solution, tablet	butalbital/aspirin/caffeine)	 Tramadol is NOT being prescribed for post-surgical pain following tonsil or adenoid procedure AND 		
Hydromorphone tablet	Benzhydrocodone/acetaminophen	 Member is not obese (BMI greater than 30kg/m2) and does not have obstructive sleep apnea or severe lung disease 		
Morphine IR solution, tablet	Butalbital/caffeine/acetaminophen/	o OR		
	codeine*	o For members < 12 years of age with complex conditions or life-limiting illness who		
Oxycodone solution, tablet	Butalbital compound w/ codeine	are receiving care under a pediatric specialist, tramadol and tramadol-containing products may be approved on a case-by-case basis		

^{*}If counseling has not been provided, the prescriber attests that a reasonable effort will be made to contact the member or the member's pharmacy to ensure that counseling is provided.

Oxycodone/acetaminophen	Butorphanol tartrate (nasal)	Preferred Codeine and codeine-containing products will receive prior authorization
tablet		approval for members meeting the following criteria may be approved for members < 18 years
	Carisoprodol/aspirin/codeine	of age if meeting the following:
Tramadol 50mg*		 Member is ≥ 12 years of age AND
	Codeine tablet	 Codeine is NOT being prescribed for post-surgical pain following tonsil or
Tramadol/acetaminophen		adenoid procedure AND
tablet*	DILAUDID (hydromorphone) (all	o Member is not obese (BMI greater than 30kg/m2) and does not have obstructive
	forms)	sleep apnea or severe lung disease AND
	DVOP AH (agataminanhan/agffaina/	Member is not pregnant or breastfeeding AND Board for action is not imposing (CER), 50 ml/min AND.
	DVORAH (acetaminophen/caffeine/dihydrocodeine)	 Renal function is not impaired (GFR > 50 ml/min) AND Member is not receiving strong inhibitors of CYP3A4 (e.g, erythmromycin,
	diffydrocodeffie)	o Member is not receiving strong inhibitors of CYP3A4 (e.g, erythmromycin, clarithromycin, telithromycin, itraconazole, ketoconazole, posaconazole,
	Fiorinal/codeine	fluconazole [\ge 200mg daily], voriconazole, delavirdine, and milk thistle) AND
	Tormar codeme	o Member meets one of the following:
	Hydrocodone/ibuprofen	Member has trialed codeine or codeine-containing products in the past no
		history of allergy or adverse drug reaction to codeine
	Hydromorphone liquid	 Member has not trialed codeine or codeine-containing products in the
		past and the prescriber acknowledges reading the following statement:
	IBUDONE (hydrocodone/ibuprofen)	"Approximately 1-2% of the population metabolizes codeine in a manner
		that exposes them to a much higher potential for toxicity. Another notable
	Levorphanol	proportion of the population may not clinically respond to codeine. We
		ask that you please have close follow-up with members newly starting
	LORTAB (hydrocodone/	codeine and codeine-containing products to monitor for safety and
	acetaminophen) elixir	efficacy."
	Managidina salutian tablet	WANT 4 O TD (1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
	Meperidine solution, tablet	**Nucynta® IR (tapentadol) may be approved for members who meet the following criteria:
	Morphine concentrated solution, oral	Member has history of trial/failure of 7-days utilization of preferred product(s)in the last 21 days OP
	syringe	days OR • If member does not meet the above criteria, prior outhorization enpressed for Nucypta IP will
	Syringe	• If member does not meet the above criteria, prior authorization approval for Nucynta IR will require trial and failure of three preferred agents. Failure is defined as lack of efficacy,
	NALOCET (oxycodone/	intolerable side effects, significant drug-drug interaction, allergy‡, or significant adverse drug
	acetaminophen)	reaction.
	, , , , , , , , , , , , , , , , , , ,	 Nucynta IR will have a maximum daily quantity of 6 tablets (180 tabs per 30 days).
	NORCO (hydrocodone/acetaminophen)	Transfer in the first that the second quantity of a masses (100 mass per 50 mays).
		Non-preferred tramadol products may be approved following trial and failure of generic tramadol
	NUCYNTA** (tapentadol)	50mg tablet AND generic tramadol/acetaminophen tablet.
	OPANA (oxymorphone)	All other non-preferred short-acting opioid products may be approved following trial and failure of
		three preferred products. Failure is defined as allergy‡, lack of efficacy, intolerable side effects, or
	OXAYDO (oxycodone)	significant drug-drug interaction.
	Oxycodone/aspirin	‡Allergy: hives, maculopapular rash, erythema multiforme, pustular rash, severe hypotension,
	Ovygodona/agataminanhan salutian	bronchospasm, and angioedema
	Oxycodone/acetaminophen solution	Overtity I imite. Showt eating enicide will be limited to a total of 120 tablets and 20 de (4/1)
	Oxycodone/ibuprofen	Quantity Limits: Short-acting opioids will be limited to a total of 120 tablets per 30 days (4/day) per member for members who are not included in the opioid treatment naive policy. Exceptions will be
	On jeodolio louprotoli	inclined for inclineds who are not included in the optoid treatment harve policy. Exceptions will be

	Oxycodone capsule, syringe, conc solution Oxymorphone tablet Pentazocine/naloxone PERCOCET (oxycodone/acetaminophen) PRIMLEV (oxycodone/acetaminophen) ROXICODONE (oxycodone) tablet ROXYBOND (oxycodone) Tramadol 100mg ULTRACET (tramadol/acetaminophen)	made for members with a diagnosis of a terminal illness (hospice or palliative care) or sickle cell anemia. For members who are receiving more than 120 tablets currently and who do not have a qualifying exemption diagnosis, a 6-month prior authorization can be granted via the prior authorization process for providers to taper members. Please note that if more than one agent is used, the combined total utilization may not exceed 120 units in 30 days. There may be allowed certain exceptions to this limit for acute situations (for example: post-operative surgery, fractures, shingles, car accident). Maximum Doses: Tramadol: 400mg/day Codeine: 360mg/day Butorphanol intranasal: 10ml per 30 days (four 2.5ml 10mg/ml package units per 30 days)
	ULTRAM (tramadol)	
Therapeutic Drug		IONS (buccal, intranasal, transmucosal, sublingual) - Effective 7/1/2020
	PA Required	Fentanyl buccal, intranasal, transmucosal, and sublingual products:
	ABSTRAL (fentanyl citrate)	Prior authorization approval may be granted for members experiencing breakthrough cancer pain and those that have already received and are tolerant to opioid drugs for the cancer pain AND are
	ACTIQ (fentanyl citrate)	currently being treated with a long-acting opioid drug. The prior authorization may be granted for up to 4 doses per day. For patients in hospice or palliative care, prior authorization will be automatically
	Fentanyl citrate	granted regardless of the number of doses prescribed.
	FENTORA (fentanyl citrate)	Ionsys transdermal system requires administration in the hospital setting and is not covered under the pharmacy benefit
	Therapeutic Drug Class	: OPIOIDS, Long Acting - Effective 7/1/2020
No PA Required	PA Required	
(*if dose met)	*NUCYNTA ER (tapentadol ER)	*Nucynta ER or Oxycontin may be approved for members who have trialed and failed: treatment with TWO preferred agents.
BUTRANS (buprenorphine) transdermal patch BNR	*OXYCONTIN (oxycodone ER) tablet	All other non-preferred products may be approved for members who have trialed and failed‡ three preferred products.
*Fentanyl 12mcg, 25mcg, 50mcg, 75mcg, 100mcg transdermal patch	ARYMO ER (morphine) tablet	‡Failure is defined as lack of efficacy with 14 day trial due to allergy (hives, maculopapular rash, erythema multiforme, pustular rash, severe hypotension, bronchospasm, and angioedema), intolerable side effects, or significant drug-drug interaction.

Morphine ER (generic MS	BELBUCA (buprenorphine) buccal			
Contin) tablet	film	Methadone Continuation:		
Tramadol ER (generic Ultram ER) tablet	Buprenorphine transdermal patch	Members who have been receiving methadone for pain indications do not have to meet non-pre- criteria. All new starts for methadone will require prior authorization under the non-preferred c listed above.		
	CONZIP (tramadol ER) capsule			
	DOLOPHINE (methadone) DURAGESIC (fentanyl) transdermal	If a prescriber would like to discuss strategies for tapering off methadone or transitioning to other pain management therapies for a Health First Colorado member, consultation with the Health First Colorado pain management physician is available free of charge by contacting the pharmacy call center helpdesk and requesting an opioid prescriber consult.		
	patch			
	EMBEDA (morphine/naltrexone)	Reauthorization: Reauthorization for a non-preferred agent may be approved if the following criteria are met: • Provider attests to continued benefit outweighing risk of opioid medication use AND		
	Fentanyl 37mcg, 62mcg, 87mcg transdermal patch	 Member met original prior authorization criteria for this drug class at time of original authorization 		
	Hydrocodone ER capsule	Quantity/Dosing Limits:		
	Hydromorphone ER tablet	 Oxycontin, Opana ER, Nucynta ER, and Zohydro ER will only be approved for twice daily dosing. 		
	HYSINGLA (hydrocodone ER) tablet	 Hysingla ER will only be approved for once daily dosing. 		
	KADIAN (morphine ER) capsule	• Fentanyl patches will require a PA for doses of more than 15 patches/30 days (taking one		
	Methadone (all forms)	strength) or 30 patches for 30 days (taking two strengths). For fentanyl patch strengths of 37mcg/hr, 62mcg/hr, and 87mcg/hr. Member must trial and fail two preferred strengths of		
	MORPHABOND (morphine ER) tablet	separate patches summing desired dose (i.e. 12mcg/hr + 50mcg/hr =62mcg/hr)		
	Morphine ER capsules			
	MS CONTIN (morphine ER) tablet			
	Oxycodone ER tablet			
	Oxymorphone ER tablet			
	Tramadol ER (generic Ryzolt/Conzip)			
	XTAMPZA ER (oxycodone) capsule			
	ZOHYDRO ER (hydrocodone) capsule			

II. Anti-Infectives

Therapeutic Drug Class:	ANTI-HERPETIC AGENTS	- Oral - <i>Effective 1/1/2020</i>
-------------------------	-----------------------------	---

		Therapeane Brag Class: 121
No	PA Required	PA Required
Acyclovir	tablet, capsule	Famciclovir tablet
	suspension under 5 years or	SITAVIG (acyclovir) buccal tablet
	ding tube)	VALTREX (valacyclovir) tablet
Valacyclo	ovir tablet	ZOVIRAX (acyclovir) capsule, tablet

Non-preferred products may be approved for members who have failed an adequate trial with oral acyclovir AND valacyclovir. Failure is defined as lack of efficacy with 14 day trial, allergy, intolerable side effects, or significant drug-drug interaction.

Sitavig (acyclovir) buccal tablet may be approved for diagnosis of recurrent herpes labialis (cold sores) if member meets non-preferred criteria listed above AND has failed trial with oral acyclovir suspension. Failure is defined as lack of efficacy with 14 day trial, allergy, intolerable side effects, or significant drug-drug interaction.

For members with a diagnosis of Bell's palsy, valacyclovir 1000 mg three times daily will be approved for 7 days if member presents with severe facial palsy.

Acyclovir suspension may be approved for:

- Members under 5 years of age OR
- Members with a feeding tube OR
- Members meeting non-preferred criteria listed above.

Maximum Dose Table			
Adult Pediatric			
Acyclovir	4000 mg daily	1200 mg daily	
Valacyclovir 4000 mg daily		Age 2-11 years: 3000mg daily Age ≥ 12 years: 4000mg daily	

Therapeutic Drug Class: ANTI-HERPETIC AGENTS- Topical - Effective 1/1/2020

No PA Required DENAVIR (penciclovir) cream ZOVIRAXBNR (acyclovir) cream ZOVIRAXBNR (acyclovir) cream XERESE (acyclovir/hydrocortisone) cream cream

Generic Acyclovir ointment/cream will be approved for members who have failed an adequate trial with Zovirax ointment/cream (diagnosis, dose and duration) as deemed by approved compendium. (Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction)

Xerese (acyclovir/hydrocortisone) prior authorization will be approved for members that meet the following criteria:

- Documented diagnosis of recurrent herpes labialis AND
- Member is immunocompetent AND
- Member has failed treatment of at least 10 days with acyclovir (Failure will be defined as significant drug-drug interaction, lack of efficacy, contraindication to or intolerable side effects)
- Member has failed treatment of at least one day with famciclovir 1500 mg OR valacyclovir 2 GM twice daily (Failure is defined as significant drug-drug interaction, lack of efficacy, contraindication to or intolerable side effects)

		ass: TETRACYCLINES - Effective 7/1/2020
No PA Required	PA Required	
Doxycycline hyclate capsules	Demeclocycline tablet	Prior authorization for non-preferred tetracycline agents may be approved if member has trialed/failed a preferred doxycycline product AND preferred minocycline. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.
Doxycycline hyclate tablets	DORYX (doxycycline DR) tablet	Prior authorization for liquid oral tetracycline formulations may be approved if member has difficulty
Doxycycline monohydrate 50mg, 100mg capsule	Doxycycline hyclate DR tablet	swallowing and cannot take solid oral dosage forms.
	Doxycycline monohydrate 40mg,	Nuzyra (omadacycline) prior authorization may be approved if member meets all of the following
Doxycycline monohydrate	75mg, 150mg capsule	criteria: the above "non-preferred" prior authorization criteria and the following:
tablets		 Member has trialed and failed[†] therapy with a preferred doxycycline product and preferred
	Doxycycline monohydrate	minocycline OR clinical rationale is provided describing why these medications cannot be
Minocycline capsules	Suspension	trialed (including resistance and sensitivity) AND
	MINOCIN (minocycline) capsule	Member has diagnosis of either Community Acquired Bacterial Pneumonia (CABP) or Acute Bacterial Skin and Skin Structure Infection (ABSSSI) or clinical rationale and
	Minocycline IR, ER tablet	supporting literature describing/supporting intended use AND one of the following: o If member diagnosis is ABSSSI, member must have trial and failure [†] of sulfamethoxazole/trimethoprim product in addition to preferred tetracyclines OR
	MINOLIRA (minocycline)	o If member diagnosis is CABP, member must have trial and failure† of either a beta- lactam antibiotic (amoxicillin/clavulanic acid) or a macrolide (azithromycin)
	NUZYRA (omadacycline)*	AND • Maximum duration of use is 14 days
	SOLODYN ER (minocycline)	·
	Tetracycline capsule	†Failure is defined as lack of efficacy with 7 day trial, allergy, intolerable side effects, or significant drug-drug interaction.)
	VIBRAMYCIN (doxycycline) suspension, syrup	
	XIMINO ER (minocycline)	
	Therapeutic Drug Class: F	LUOROQUINOLONES -Oral -Effective 1/1/2020
No PA Required	PA Required	
CIPRO (ciprofloxacin) oral suspension (<5 years old)	AVELOX (moxifloxacin) tablet	Non-preferred products will be approved for members who have failed an adequate trial (7 days) with at least one preferred product. (Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.)
1	BAXDELA (delafloxacin) tablet	
Ciprofloxacin oral suspension (<5 years old)	CIPRO (ciprofloxacin) tablet	CIPRO/ciprofloxacin suspension approved for members < 5 years of age without PA
Ciprofloxacin tablet	CIPRO XR (ciprofloxacin ER) tablet	For members ≥ 5 years of age, CIPRO/ciprofloxacin suspension will only be approved for those members who cannot swallow a whole or crushed tablet

Levofloxacin tablet	Ciprofloxacin oral suspension (>5 years old), ER tablet LEVAQUIN (levofloxacin) tablet Levofloxacin oral solution Moxifloxacin tablet Ofloxacin tablet	Levofloxacin solution will be approved for members who require administration via feeding tube OR who have failed an adequate trial (7 days) of ciprofloxacin suspension. (Failure is defined as: lack of efficacy, presence of feeding tube, allergy, intolerable side effects, or significant drug-drug interaction.)	
	Therapeutic Drug Class: HEPA		
D. D		ct Acting Antivirals (D	(AAS)
PA Required	l for all agents in this class		Duefound Handitie C Vinna Treatment Designation
EPCLUSA ^{BNR}	Sofosbuyir/ladinasyir	Harvoni	Preferred Hepatitis C Virus Treatment Regimens Harvoni will be approved for members 3 years and older with chronic
(sofosbuvir/velpatasvir)	Sofosbuvir/ledipasvir	(ledipasvir/sofosbuvir)	HCV infection; GT 1, 4-6; who are NC, have CC, or in combination
(SOIOSOUVII/ VCIPALASVII)	Sofosbuvir/velpatasvir	(realpus vii)	with ribavirin in adults with DC; and meet the below applicable criteria
HARVONI ^{BNR}	Soloso u via volpumo vii	Mavyret	Mavyret will be approved for members 12 years and older or weighing
(sofosbuvir/ledipasvir)	SOVALDI (sofosbuvir)	(glecapravir/pibrentasvir)	at least 45 kg with chronic HCV infection, GT 1-6 who are NC or have
	,		CC (Child-Pugh A), and meet the below applicable criteria
MAVYRET	VOSEVI	Epclusa	Epclusa will be approved for adult members with chronic HCV
(glecaprevir/pibrentasvir)	(sofosbuvir/velpatasvir/voxilaprevir)	(sofosbuvir/velpatasvir)	infection, GT 1-6, who are NC, have CC, or in combination with
	ZEDATIED (alberrain/anagamerrin)		ribavirin in DC; and meet the below applicable criteria
	ZEPATIER (elbasvir/grazoprevir)	(GT-Genotype, NC-Non-Cirrhot	
		 (GT-Genotype, NC-Non-Cirrhotic, CC-Compensated Cirrhosis, DC-Decompensated Cirrhosis) All preferred agents will be granted prior authorization if the following criteria are met: Physician attests to provide one HCV RNA test result from 12-24 weeks post-treatment showing SVR, AND Member must have received, or be in the process of receiving, full courses of both Hepatitis A and Hepatitis B vaccinations, or have immunity; AND Members must have genotyping results within 1 year before anticipated therapy start date; AND If member is abusing/misusing alcohol or controlled substances, member must be receiving or be enrolled in counseling or a substance use treatment program for at least 1 month prior to starting treatment; AND Agent must be prescribed by an infectious disease specialist, gastroenterologist, or hepatologist OR prescribed by any primary care provider in consultation with an infectious disease specialist, gastroenterologist or hepatologist; OR for treatment naïve members without cirrhosis, prescribed by any primary care who has completed the hepatitis C (HCV) ECHO series (four, 1-hour trainings); AND Physician attests to the member's readiness for adherence; AND Prescribers may utilize assessment tools to evaluate readiness of the patient for treatment, some examples are available at: http://www.integration.samhsa.gov/clinical- 	

<u>practice/screening-tools#drugs</u> or Psychosocial Readiness Evaluation and Preparation for Hepatitis C Treatment (PREP-C) is available at: https://prepc.org/

- Physician attests to member having Chronic HCV infection (Presence of HCV RNA viral load for ≥ 6 months to confirm infection is not acute or evidence that the infection has spontaneously resolved) **AND**
- For women of childbearing potential, serum pregnancy testing is conducted within 30 days of expected direct-acting antiviral start date **AND**
- The provider must provide the following laboratory tests within 6 months of initiating therapy:
 - Complete Blood Count (CBC)
 - Hepatic Function Panel (i.e. albumin, total and direct bilirubin, alanine aminotransferase (ALT), aspartate aminotransferase (AST), and alkaline phosphatase levels)
 - o Calculated glomerular filtration rate (GFR)
 - o If cirrhosis is present, calculation of the Child-Turcotte-Pugh (CTP) Score
 - o Transplant status as applicable (pre-, post-, N/A)

For ribavirin-containing regimens only:

- Member is not a pregnant female or a male with a pregnant female partner AND
- Women of childbearing potential and their male partners must attest that they will use two forms
 of effective (non-hormonal) contraception during treatment AND
- Member does not meet any of the following ineligibility criteria for use of ribavirin:
 - Pregnant women and men whose female partners are pregnant
 - Known hypersensitivity to ribavirin
 - Autoimmune hepatitis
 - Hemoglobinopathies
 - Creatinine Clearance < 50mL/min
 - Co-administered with didanosine

Non-Preferred Agents:

All non-preferred agents or treatment regimens will be granted prior authorization if the criteria for preferred agents above is satisfied **PLUS** documentation is provided indicating an acceptable rationale for not prescribing a preferred treatment regimen. (Acceptable rationale may include: patient-specific medical contraindications to a preferred treatment, member has initiated treatment on a non-preferred drug and needs to complete therapy.)

Re-treatment:

All requests for HCV re-treatment for members who have failed therapy with a DAA will be reviewed on a case-by-case basis.

Additional information will be requested for retreatment requests including, but not limited to:

- Previous regimen medications and dates treated
- Genotype of previous HCV infection
- Any information regarding adherence to previously trialed regimen(s) and current chronic medications

		Adverse effects experienced from previous treatment regimen
		Concomitant therapies during previous treatment regimen
		 For regimens ≥ 12 weeks in duration: Physician attests that if the week 4 HCV RNA is detectable (>25 copies) while on therapy, HCV RNA will be reassessed in 2 weeks. If the repeated HCV RNA level has not decreased (i.e. >1 log10 IU/ml from nadir) all treatment will be discontinued unless documentation is provided which supports continuation of therapy; AND All approvals will initially be for an 8-week time period, with further approvals dependent on the submission of HCV RNA levels at treatment times of 4 weeks, 12 weeks, and 20 weeks as applicable to justify continuing drug therapy; AND Refills should be reauthorized in order to continue the appropriate treatment plan. The member MUST receive refills within one week of completing the previous fill. Please allow ample time for reauthorization after HCV RNA levels are submitted. Grandfathering: Members currently receiving treatment with a non-preferred agent will receive approval to finish their treatment regimen, provided required documentation is sent via normal PAR process.
		Hepatitis C Treatment requests must be submitted via the Hepatitis C specific PAR form which can be accessed on the Pharmacy Resources page at: https://www.colorado.gov/hcpf/pharmacy-resources
		Ribavirin Products
No PA Required	PA Required	
Ribavirin capsule	MODERIBA (ribavirin)	Non-preferred ribavirin products require prior authorizations which will be evaluated on a case-by-case basis.
Ribavirin tablet	REBETOL (ribavirin) solution RIBASPHERE (ribavirin)	Members currently receiving non-preferred ribavirin product will receive approval to continue that product for the duration of their HCV treatment regimen.
	Ribavirin solution	
	1	III. Cardiovascular
		ANGIOTENSIN MODIFIERS - Effective 7/1/2020
		converting enzyme inhibitors (ACE Inh)
No PA Required	PA Required	Non-preferred ACE inhibitors, ACE inhibitor combinations, ARBs, ARB combinations, renin
Benazepril tablet	ACCUPRIL (quinapril) tablet	inhibitors, and renin inhibitor combination products may be approved for members who have trialed and failed treatment with three preferred products (failure is defined as lack of efficacy with a 4 week trial, allergy, intolerable side effects, or significant drug-drug interaction).
Englandit tablet	AT TO A COE (' 'I) 1

	TRIBENZOR (amlodipine/olmesartan/ HCTZ)			
	Renin Inhibito	ors & Renin Inhibitor Combinations		
	PA Required	Non-preferred renin inhibitors and renin inhibitor combination products may be approved for		
	Aliskiren	members who have failed treatment with three preferred products from the angiotensin modifier class (failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction).		
	TEKTURNA (aliskiren)	interaction).		
	TEKTURNA HCT (aliskiren/HCTZ)	Renin inhibitors and combinations will not be approved in patients with diabetes. Renin inhibitors are contraindicated when used in combination with an ACE-inhibitor, ACE-inhibitor combination, ARB, or ARB-combination.		
Therapeutic Drug Class: PULMONARY ARTERIAL HYPERTENSION THERAPIES - Effective 1/1/2020				
Phosphodiesterase Inhibitors				
*Must meet eligibility criteria	PA Required	*Eligibility Criteria for all agents in the class		
*Sildenafil (generic Revatio)	ADCIRCA (tadalafil)	Approval will be granted for a diagnosis of pulmonary hypertension.		
20 mg tablet *Tadalafil 20mg	ALYQ (tadalafil) 20mg	Non-preferred products may be approved for members who have failed treatment with preferred sildenafil AND preferred tadalafil. Failure is defined as lack of efficacy with 4 week trial, allergy, intolerable side effects, or significant drug-drug interaction.		
20119	REVATIO (sildenafil) 20mg tablet, suspension	Revatio (sildenafil) suspension will approved for members who are unable to take/swallow tablets		
	Sildenafil (generic Revatio) oral suspension	Grandfathering: Members who have been previously stabilized on a Non-preferred product can receive approval to continue on the medication.		
	,	Endothelin Antagonists		
*Must meet eligibility criteria	PA Required	*Eligibility Criteria for all agents in the class		
*LETAIRIS ^{BNR} (ambrisentan) tablet	Ambrisentan (generic Letairis) tablet	Approval will be granted for a diagnosis of pulmonary hypertension. Member and prescriber should be enrolled in applicable REMS program for prescribed medication.		
*TRACLEER 62.5mg, 125mg	Bosentan (generic Tracleer) 62.5mg, 125mg tablet	Non-preferred agents will be approved for members who have trialed and failed two preferred agents. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.		
(bosentan) tablet BNR	OPSUMIT (macitentan)	Grandfathering: Members who have been previously stabilized on a Non-preferred product can		
	TRACLEER (bosentan) 32mg tablet for suspension	receive approval to continue on the medication.		
		Prostanoids		
A 1 OD GUILOTED				

*Must meet eligibility criteria *Epoprostenol (generic Flolan) vial *ORENITRAM (treprostinil) ER tablet *VENTAVIS (iloprost) inhalation solution	PA Required FLOLAN (epoprostenol) vial REMODULIN (treprostinil) vial Treprostinil (generic Remodulin) vial TYVASO (treprostinil) inhalation solution UPTRAVI (selexipag) tablet VELETRI (epoprostenol) vial	*Eligibility Criteria for all agents in the class Approval will be granted for a diagnosis of pulmonary hypertension. Non-preferred products will be approved for members who have failed treatment with a Preferred Product. (Failure is defined as: lack of efficacy, allergy, intolerable side effects, contraindication to IV therapy or significant drug-drug interaction) Grandfathering: Members who have been previously stabilized on a non-preferred product can receive approval to continue on the medication.
	Guanvl	ate Cyclase (sGC) Stimulator
	PA Required ADEMPAS (riociguat) tablet	 Adempas will be approved for patients who meet the following criteria: Patient is not a pregnant female and is able to receive monthly pregnancy tests while taking Adempas and one month after stopping therapy. AND Women of childbearing potential and their male partners must use one of the following contraceptive methods during treatment and one month after stopping treatment (e.g, IUD, contraceptive implants, tubal sterilization, a hormone method with a barrier method, two barrier methods, vasectomy with a hormone method, or vasectomy with a barrier method). AND Patient is not receiving dialysis or has severe renal failure (e.g, Crcl < 15 ml/min). AND Patient does not have severe liver impairment (e.g, Child Pugh C). AND Prescriber must be enrolled with the Adempas REMS Program. AND Female patients, regardless of reproductive potential, must be enrolled in the Adempas REMS program prior to starting therapy. AND Patient has a diagnosis of persistent/recurrent chronic thromboembolic pulmonary hypertension (CTEPH) (WHO Group 4) after surgical treatment or has inoperable CTEPH OR Patient has a diagnosis of pulmonary hypertension and has failed treatment with a preferred product for pulmonary hypertension. (Failure is defined as a lack of efficacy, allergy, intolerable side effects, or significant drug-drug interactions).
		class: LIPOTROPICS - Effective 4/1/2020
No PA Required Colesevelam tablet	PA Required ANTARA (fenofibrate)	Non-preferred bile acid sequestrates may be approved if the member has failed treatment with 2 preferred products in the last 12 months (failure is defined as lack of efficacy with 4 week trial, allergy, intolerable side effects or significant drug-drug interactions).
Colestipol tablet Cholestyramine packet, light packet	Colesevelam packet COLESTID (colestipol) tablet, granules Colestipol granules	Non-preferred fibrates may be approved if the member has failed treatment with generic gemfibrozil or generic fenofibrate and niacin ER in the last 12 months (failure is defined as lack of efficacy with 4 week trial of each drug, allergy, intolerable side effects or significant drug-drug interactions).

prior ilent nse as

tablet

CELEXA (citalopram) tablet

Prior authorization for Fetzima, Trintellix, or Viibryd will be approved for members who have failed an adequate trial with four preferred newer generation anti-depressant products (failure is defined as lack of efficacy with 6 week trial, allergy, intolerable side effects, or significant drug-drug interaction).

All non-preferred products not listed above will be approved for members who have failed adequate trial with three preferred newer generation anti-depressant products. If three preferred newer generation anti-depressant products are not available for indication being treated, approval of prior authorization for non-preferred products will require adequate trial of all preferred products FDA approved for that indication (failure is defined as lack of efficacy with 6 week trial, allergy, intolerable side effects, or significant drug-drug interaction).

	TASMAR (tolcapone) tablet	Grandfathering: Members currently stabilized on a non-preferred product may receive approval to continue therapy with that product.				
	Tolcapone tablet					
	Therapeutic Drug Class: ATYPI	CAL ANTI-PSYCHOTICS - Oral - Effective 4/1/2020				
No PA Required*	PA Required	Non-preferred products may be approved for members meeting all of the following: • Medication is being prescribed for an FDA-Approved indication (Table 1) AND				
For injectable Atypical Antipsychotics please see Appendix P for criteria	Non-preferred brand name medications do not require a prior authorization when the equivalent	Prescription meets dose and age limitations (Table 3) AND				

Aripiprazole tablet
Clozapine tablet
LATUDA (lurasidone) 2 nd line**
Olanzapine tablet, ODT
Quetiapine IR tablet***
Quetiapine ER tablet
Risperidone tablet, oral sol ODT
Ziprasidone

generic is preferred and "dispense as written" is indicated on the prescription.

ABILIFY (aripiprazole) tablet, oral soln, ODT, MyCite

Aripiprazole oral solution****, ODT

CAPLYTA (lumateperone)

CLOZARIL (clozapine)

Clozapine ODT

GEODON (ziprasidone)

FANAPT (iloperidone)

FAZACLO (clozapine ODT)

Iloperidone

INVEGA (paliperidone)

olanzapine/fluoxetine

NUPLAZID (pimavanserin)

Paliperidone

REXULTI (brexpiprazole)

RISPERDAL (risperidone) tablet, M-tab (ODT), oral solution

SAPHRIS (asenapine)

SEROQUEL IR (quetiapine IR)***

SEROOUEL XR (quetiapine ER)***

SYMBYAX (olanzapine/fluoxetine)

VERSACLOZ (clozapine suspension)

• Member has history of trial and failure of three preferred products (failure defined as lack of efficacy with 6 week trial, allergy, intolerable side effects, significant drug-drug interactions, or known interacting genetic polymorphism that prevents safe preferred product dosing)

*Age Limits: All products including preferred products will require a PA for members younger than the FDA approved age for the agent (Table 3). Members younger than the FDA approved age for the agent who are currently stabilized on an atypical antipsychotic will be eligible for grandfathering. Atypical Antipsychotic prescriptions for members under 5 years of age may require a provider-provider telephone consult with a child and adolescent psychiatrist (provided at no cost to provider or member).

**Latuda (lurasidone) may be approved for the treatment of schizophrenia or bipolar depression if the member has tried and failed treatment with one preferred product (qualifying diagnosis verified by AutoPA).

***Quetiapine IR when given at sub-therapeutic doses may be restricted for therapy. Low-dose quetiapine (<150mg/day) is only FDA approved as part of a drug titration schedule to aid patients in getting to the target quetiapine dose. PA will be required for quetiapine < 150mg per day except for utilization (when appropriate) in members 65 years or older. PA will be approved for members 10-17 years of age with approved diagnosis (Table 3) stabilized on <150mg quetiapine IR per day.

****Aripiprazole solution: Aripiprazole <u>tablet</u> quantity limit is 2 tablets/day for pediatric members to allow for incremental dose titration, and use of the preferred tablet formulation should be considered for dose titrations when possible and clinically appropriate. If incremental dose cannot be achieved with titration of the aripiprazole tablet for members < 18 years of age OR for members unable to swallow solid tablet dosage form, aripiprazole solution may be approved. For all other cases, aripiprazole solution is subject to meeting non-preferred product approval criteria listed above.

Nuplazid (pimavanserin tartrate) may be approved for the treatment of hallucinations and delusions associated with Parkinson's Disease psychosis AND following trial and failure of therapy with quetiapine or clozapine (failure will be defined as intolerable side effects, drug-drug interaction, or lack of efficacy).

Abilify MyCite may be approved if meeting all of the following:

- Member has history of adequate trial and failure of 5 preferred agents (one trial must include aripiprazole tablet). Failure is defined as lack of efficacy with 6 week trial on maximally tolerated dose, allergy, intolerable side effects, significant drug-drug interactions AND
- Information is provided regarding adherence measures being recommended by provider and followed by member (such as medication organizer or digital medication reminders) AND
- Member has history of adequate trial and failure of 3 long-acting injectable formulations of atypical antipsychotics, one of which must contain aripiprazole (failure is defined as lack of efficacy with 8 week trial, allergy, intolerable side effects, significant drug-drug interactions) AND
- Abilify MyCite is being used with a MyCite patch and member is using a compatible mobile application. AND

Medication adherence information is being shared with their provider via a web portal or dashboard.

<u>Quantity Limits</u>: Quantity limits will be applied to all products (Table 2). In order to receive approval for off-label dosing, the member must have an FDA approved indication and must have tried and failed on the FDA approved dosing regimen.

<u>Grandfathering</u>: Members currently stabilized on a non-preferred atypical antipsychotic or Latuda can receive approval to continue therapy with that agent for one year.

Table 1: Approved Indications

Drug	Indication
Abilify (aripiprazole)	Schizophrenia
	Acute treatment of manic or mixed episodes associated with bipolar I disorder
	Adjunctive treatment of major depressive disorder
	Irritability associated with autistic disorder
	Treatment of Tourette's Disorder
Caplyta (lumateperone)	Schizophrenia
Fanapt (iloperidone)	Acute treatment of schizophrenia in adults
Fazaclo, Versacloz (clozapine)	Treatment-resistant schizophrenia
	Reducing the risk of recurrent suicidal behavior in patients with schizophrenia or schizoaffective disorder
Geodon (ziprasidone)	Schizophrenia
	Bipolar I disorder (acute mixed or manic episodes and maintenance treatment as adjunct to lithium or valproate)
	Acute treatment of agitation in schizophrenia
Latuda (lurasidone)	Schizophrenia
	Bipolar I disorder
Nuplazid (pimavanserin)	hallucinations and delusions associated with Parkinson's disease psychosis
Invega (paliperidone)	Schizophrenia
	Schizoaffective disorder
Risperdal (risperidone)	Schizophrenia
	Bipolar mania
	Irritability associated with autistic disorder
Rexulti (brexpiprazole)	Adjunctive therapy to antidepressants for the treatment of major depressive disorder
	Schizophrenia
Saphris (asenapine)	Acute and maintenance of schizophrenia
	Bipolar mania, monotherapy
	Maintenance treatment of bipolar I disorder as an adjunct to lithium or divalproex
Seroquel (quetiapine)	Treatment of schizophrenia
Seroquel XR (quetiapine ER)	• Acute treatment of manic or mixed episodes associated with bipolar I disorder, as monotherapy or as an adjunct to lithium or divalproex
	Maintenance treatment of bipolar I disorder as an adjunct to lithium or divalproex
	Adjunctive treatment of major depressive disorder (Seroquel XR only)
Symbyax (olanzapine/fluoxetine)	Treatment resistant depression
	Bipolar I disorder
Vraylar (cariprazine)	Schizophrenia
	Bipolar (acute treatment)

Zyprexa (olanzapine)	• 5	Schizophrenia
	• E	Bipolar I disorder

Table 2: Quantity Limits

Brand Name	Generic Name	Quantity Limits	
Abilify	Aripiprazole	Maximum one tablet per day (maximum of two tablets per day allowable for members < 18 years of age to accommodate for incremental dose changes)	
Caplyta	Lumateperone	Maximum dosage of 42mg per day	
Clozaril	Clozapine	Maximum dosage of 900mg per day	
Fazaclo	Clozapine	Maximum dosage of 900mg per day	
Fanapt	Iloperidone	Maximum two tablets per day	
Geodon	Ziprasidone	Maximum two capsules per day	
Invega	Paliperidone	Maximum one capsule per day	
Latuda	Lurasidone	Maximum one tablet per day (If dosing 160mg for schizophrenia, then max of two tablets per day)	
Nuplazid	Pimavanserin	Maximum dosage of 34mg per day	
Risperdal	Risperidone	Maximum dosage of 12mg/day	
Rexulti	Brexpiprazole	Maximum of 3mg/day for MDD adjunctive therapy, Maximum of 4mg/day for schizophrenia	
Saphris	Asenapine	Maximum two tablets per day	
Secuado	Asenapine	Maximum 1 patch per day	
Seroquel	Quetiapine	Maximum three tablets per day	
Seroquel XR	Quetiapine ER	Maximum one tablet per day (for 300mg & 400mg tablets max 2 tablets per day)	
Symbyax	Olanzapine/ fluoxetine	Maximum three capsules per day (18mg olanzapine/75mg fluoxetine)	
Vraylar	Cariprazine	Maximum dosage of 6mg/day	
Zyprexa	Olanzapine	Maximum one tablet per day	
Zyprexa Zydis	Olanzapine ODT	Maximum one tablet per day	

Table 3: FDA Approved Pediatric Dosing by Age

Therapeutic Drug Class: LITHIUM AGENTS -Effective 4/1/2020				
No PA Required	PA Required			
Lithium Carbonate capsule Lithium Carbonate tablet	Non-preferred brand name medications do not require a prior authorization when the equivalent	Non-preferred products may be approved with trial and failure of one preferred agent (failure is defined as lack of efficacy with 6 week trial, allergy, intolerable side effects, significant drug-drug interactions, intolerance to dosage form).		
Lithium ER tablet	generic is preferred and "dispense as written" is indicated on the prescription.	Grandfathering: Members currently stabilized on a non-preferred product may receive approval to continue therapy with that product.		
	LithoBID ER (lithium ER) tablet			
	Lithium Citrate soln			

		E – RELATED PEPTIDE INHIBITORS (CGRPis) -Effective 4/1/2020
PA Required for all agents		*Emgality 120mg (galcanezumab) or Aimovig (erenumab) may be approved for members meeting
*AIMOVIG (erenumab)	AJOVY (fremanezumab) syringe	Migraine Prevention Prior Authorization Criteria below.
autoinjector	, , ,	Migraine Prevention Prior Authorization Criteria (must meet all of the following):
	EMGALITY 100mg (galcanezumab)	Member is 18 years of age or older AND
*EMGALITY 120mg	syringe	Member is in need of prevention of episodic or chronic migraine AND
(galcanezumab) pen, syringe		Member has diagnosis of migraine with or without aura AND
	NURTEC (rimegepant) ODT	Member has tried and failed 2 oral preventative pharmacological agents listed as Level A per American Headache Society/American Academy of Neurology (i.e. divalproex,
	UBRELVY (ubrogepant) tablet	topiramate, metoprolol, propranolol). Failure is defined as lack of efficacy, allergy,
		intolerable side effects, or significant drug-drug interaction AND
		 Headache count: If prescribed for episodic migraine member has history of 4-14 migraine days per month OR if prescribed for chronic migraine member has history of 15 or more
		headache days per month where 8 or more were migraine days for three or more months AND
		Member does not have history of MI, stroke, TIA, unstable angina, coronary artery bypass surgery, or other revascularization procedures within previous 12 months AND
		Prescription meets one of the following:
		 Medication is not prescribed for chronic migraine with medication overuse headache
		OR
		o Member is prescribed Aimovig for chronic migraine with medication overuse headache resulting from taking triptans ≥ 10 days/month, non-narcotic analgesics ≥ 15
		days/month (such as acetaminophen, NSAID), or a combination of analgesics ≥ 10
		days/month (including non-narcotic, ergot, opioid, butalbital) AND member has not been using a migraine prevention medication for 2 months prior to Aimovig
		prescription
		AND
		Initial authorization will be limited to the following:
		o For episodic migraine: Initial authorization will be for 6 months. Continuation (12
		month authorization) will require documentation of clinically significant improvement after 4 months use (and documentation of number of migraine days per month)
		o For chronic migraine: Initial authorization will be for 4 months. Continuation (12 month
		authorization) will require documentation of clinically significant improvement after 3
		months use (and documentation of number of migraine days per month)
		Non-Preferred Medications for Migraine Prevention:
		Non-preferred medications for migraine prevention may be approved if the member meets the
		Migraine Prevention Prior Authorization Criteria above AND the member has history of adequate
		trial and failure of Emgality 120mg AND Aimovig therapy (failure is defined as lack of efficacy with 4 week trial, allergy, intolerable side effects, or significant drug-drug interaction).
		Members taking a non-preferred agent for migraine prevention that have not shown clinically
		significant improvement for 4 months for acute episodic migraine treatment or 3 months for chronic

migraine treatment will be allowed to transition to a preferred CGRP agent without meeting the "headache count" criteria listed above.

Non-Preferred Medications for Acute Migraine Treatment or Cluster Headache Treatment:

Non-preferred medications for acute migraine treatment (Ubrelvy) may be approved for members meeting all of the following:

- Member is 18 years of age or older AND
- Medication is being prescribed to treat migraine headache with moderate to severe pain AND
- Member is not receiving an injectable form of CGRP medication for any indication AND
- Member has history of trial and failure of all of the following (failure is defined as lack of efficacy with 4 week trial, contraindication, allergy, intolerable side effects, or significant drug-drug interaction):
 - o Three triptans (including at least two different routes of administration) AND
 - Two NSAID agents AND
 - O Dihydroergotamine vial or an ergotamine combination product

Non-preferred medications for treatment of cluster headache (Emgality 100mg) may be approved for members meeting all of the following:

- Member is 19-65 years of age AND
- Member meets diagnostic criteria for episodic cluster headache (has had no more than 8 attacks per day, a minimum of one attack every other day, and at least 4 attacks during the week prior to this medication being prescribed) AND
- Member is not taking other preventative medications to reduce the frequency of cluster headache attacks AND
- Member has history of trial and failure of all of the following (failure is defined as lack of efficacy with 4 week trial, contraindication, allergy, intolerable side effects, or significant drug-drug interaction):
 - o Oxygen therapy AND
 - Sumatriptan subcutaneous or intranasal AND
 - Zolmitriptan intranasal AND
- Member is not prescribed this medication for medication overuse headache AND
- Member does not have ECG abnormalities compatible with acute cardiovascular event or conduction delay AND
- Member does not have a history within the last 6 months of myocardial infarction, unstable angina, percutaneous coronary intervention, coronary artery bypass grafting, deep vein thrombosis, or pulmonary embolism AND
- Member does not have a history of stroke, intracranial or carotid aneurysm, intracranial hemorrhage, or vasospastic angina, clinical evidence of peripheral vascular disease, or diagnosis of Raynaud's AND
- Initial authorization will be limited to 8 weeks. Continuation (12 month authorization) will require documentation of clinically relevant improvement with no less than 30% reduction in headache frequency in a 4 week period.

Maximum Dosing: Aimovig Gremmunh): 140mg per 30 days Emgality 120mg (galcanezumah): 240mg once as first loading dose then 120mg monthly Emgality 100mg (galcanezumah): 240mg per 30 days Ajovy (fremanczumah): 225mg monthly or 675mg every three months

		 Dayvigo (lemborexant) may be approved for adult member that meet the following: Member has trialed and failed therapy with two preferred agents AND Belsomra (surovexant). Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction AND Member is not receiving strong inhibitors (such as erythromycin, clarithromycin, telithromycin, itraconazole, ketoconazole, posaconazole, fluconazole, voriconazole, delavirdine, and milk thistle) or inducers (such as carbamazepine, oxcarbazepine, phenobarbital, phenytoin, rifampin, rifabutin, rifapentine, dexamethasone, efavirenz, etravirine, nevirapine, darunavir/ritonavir, ritonavir, and St John's Wort) of CYP3A4 AND Member does not have a diagnosis of narcolepsy
		Rozerem (ramelteon) may be approved for adult members with a history/concern of substance abuse or for documented concern of diversion within the household without failed treatment on a preferred agent
		Prior authorization will be required for prescribed doses exceeding maximum (Table 1).
Benzodiazepines		
No PA Required* (unless age, dose, or duplication criteria apply)	PA Required Estazolam tablet	Non-preferred benzodiazepine sedative hypnotics may be approved for members who have trialed and failed therapy with two preferred benzodiazepine agents (failure is defined as lack of efficacy with a 2-week trial, allergy, intolerable side effects, or significant drug-drug interaction).
Temazepam 15mg, 30mg capsule	Flurazepam capsule HALCION (triazolam) tablet	Temazepam 7.5mg and 22.5 mg may be approved if the member has trialed and failed temazepam 15mg or 30mg AND one other preferred product (failure is defined as lack of efficacy with a 2 week trail, allergy, intolerable side effects, or significant drug-drug interaction).
Triazolam tablet	RESTORIL (all strengths) capsule Temazepam 7.5mg, 22.5mg capsule	<u>Children:</u> Prior authorization will be required for all sedative hypnotic agents when prescribed for children < 18 years of age.

	ent in the sedative hypnotic drug class will be approved at a time in the same sedative hypnotic class or differing classes will not be
All sedative hypnotics will exceeding 90 days of therap	require prior authorization for member's \geq 65 years of age when by.
Grandfathering: Members or receive authorization to con	currently stabilized on a non-preferred benzodiazepine medication may attinue that medication.
Prior authorization will be r	required for prescribed doses exceeding maximum (Table 1).

Table 1: Seda	Table 1: Sedative Hypnotic Maximum Dosing		
Brand	Generic	Maximum Dose	
		Non-Benzodiazepine	
Ambien CR	Zolpidem CR	12.5 mg/day	
Ambien IR	Zolpidem IR	10 mg/day	
Belsomra	Suvorexant	20 mg/day	
Dayvigo	Lemborexant	10mg/day	
Edluar	Zolpidem sublingual	Men: 10 mg/day Women: 5 mg/day	
Intermezzo	Zolpidem sublingual	Men: 3.5mg/day Women: 1.75 mg/day	
Lunesta	Eszopiclone	3 mg/day	
Sonata	Zaleplon	20 mg/day	
Rozerem	Ramelteon	8 mg/day	
Zolpimist	Zolpidem spray	Men: 10 mg (2 sprays)/day Women: 5 mg (1 spray)/day	
Benzodiazepine			
Halcion	Triazolam	0.5 mg/day	
Restoril	Temazepam	30 mg/day	
-	Estazolam	2 mg/day	
-	Flurazepam	30 mg/day	
-	Quazepam	15 mg/day	

Therapeutic Drug Class: SKELETAL MUSCLE RELAXANTS -Effective 7/1/2020		
No PA Required (if under 65	PA Required	All agents in this class will require a PA for members 65 years of age and older. The
years of age)*		maximum allowable approval will be for a 7-day supply.
	AMRIX ER (cyclobenzaprine ER)	
Baclofen (generic Lioresal)		Non-preferred skeletal muscle relaxants will be approved for members who have trialed
	Carisoprodol	and failed‡ three preferred agents. (Failure is defined as: lack of efficacy, allergy,
Cyclobenzaprine (generic		intolerable side effects, contraindication to, or significant drug-drug interactions.)
Flexeril) 5mg and 10mg tablet	Chlorzoxazone	

*No PA Required (if age,	ZANAFLEX (tizanidine) Therapeutic Drug Class: STIMUL PA Required	ANTS AN	
	ZANAFLEX (tizanidine)		
	Tizanidine capsules		
	SOMA (carisoprodol)		
	SKELAXIN (metaxalone)		
	ROBAXIN (methocarbamol)		
	Orphenadrine ER		
	NORGESIC FORTE (orphenadrine/aspir.	in/caffeine)	
	Metaxalone		
	METAXALL (metaxalone)		•
	LORZONE (chlorzoxazone)		•
	FEXMID (cyclobenzaprine)		•
	*Dantrolene		
	DANTRIUM (dantrolene)		:
Tizanidine tablet	Cyclobenzaprine ER capsule		1
Methocarbamol	Cyclobenzaprine 7.5mg tabs		,

Authorization for any **CARISOPRODOL** product will be given for a maximum 3week one-time authorization for members with acute, painful musculoskeletal conditions who have failed treatment with three preferred products within the last 6 months.

*Dantrolene will be approved for members 5-17 years of age who have trialed and failed! one preferred agent and meet the following criteria:

- Documentation of age-appropriate liver function tests AND
- One of following diagnoses: Multiple Sclerosis, Cerebral Palsy, stroke, upper motor neuron disorder, or spinal cord injury
- Dantrolene will be approved for the period of one year
- If a member is stabilized on dantrolene at <18 years of age, they may continue to receive approval after turning 18 years of age
- (Failure is defined as: lack of efficacy, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions.)

‡Failure is defined as: lack of efficacy with 14 day trial, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions.

D RELATED AGENTS -Effective 10/1/2019

met)

Brand/generic changes effective 11/01/19

Armodafinil (generic Nuvigil)

Atomoxetine (generic Strattera)

Mixed-amphetamine salts (generic Adderall IR)

ADDERALL IR (mixed-amphetamine salts)

ADDERALL XR (mixed amphetamine salts ER)

ADHANSIA XR (methylphenidate ER) capsule

ADZENYS ER. XR ODT (amphetamine)

nedications may be approved through AutoPA for indications listed in Table 1 (preferred may also receive approval for off-label use for fatigue associated with multiple sclerosis).

Prior authorization for non-preferred medications used for indications listed in Table 1 may be approved for members meeting the following criteria (For Sunosi (solriamfetol), refer to criteria listed below):

- Member has documented failure with three preferred products in the last 24 months if age \geq 6 years or documented failure with one preferred product in the last 24 months if age 3 –5 years (Failure is defined as: lack of efficacy with a four week trial, allergy, intolerable side effects, or significant drug-drug interaction). Trial and failure of preferred agents will not be required for members meeting the following:
 - For Daytrana, Methylin solution, Quillichew, Quillivant XR and Dyanavel XR, one preferred trial must include Vyvanse chewable tablet, Focalin XR, Vyvanse capsules or

	APTENSIO XR (methylphenidate ER)
Mixed-Amphetamine salts ER (generic Adderall XR)	Clonidine ER tablet
CONCERTA (Methylphenidate ER) tablet ^{BNR}	COTEMPLA XR ODT (methylphenidate ER)
Dexmethylphenidate IR (generic Focalin)	D-amphetamine spansule
FOCALIN XR *BNR* (dexmethylphenidate ER)	DAYTRANA (methylphenidate transdermal)
Guanfacine ER	DESOXYN (methamphetamine)
	DEXEDRINE (dextroamphetamine)
Methylphenidate IR (generic Ritalin IR)	DEXTROSTAT (dextroamphetamine)
Modafinil (generic Provigil)	Dexmethylphenidate (generic Focalin XR)
VYVANSE (lisdexamfetamine) capsules, chewables	DYANAVEL XR solution (amphetamine)
	EVEKEO (amphetamine)
	FOCALIN IR (dexmethylphenidate)
	INTUNIV (guanfacine ER)
	JORNAY PM (methylphenidate)
	KAPVAY (clonidine ER)
	METADATE ER (methylphenidate ER)
	Methylphenidate ER (generic Aptesio XR)
	Methylphenidate ER (generic Concerta)
	Methylphenidate ER 72mg (generic Relexxii)

mixed amphetamine salts ER (generic Adderall XR) and member must have a documented difficulty swallowing that are unable to utilize alternative dosing with preferred tablet and capsule formulations.

**Max Dose: Prior authorization may be approved for doses that are higher than the listed maximum dose (Table 2) if member meets all of the following criteria:

- Member is taking medication for indicated use listed in table 1 AND
- Member has 30 day trial or failure of three different preferred or non-preferred agents at maximum doses listed in table 2 **AND**
- Documentation of member's symptom response to maximum doses of three other agents is provided AND
- Member is not taking a sedative hypnotic medication (from sedative hypnotic PDL class, i.e. temazepam, triazolam, zolpidem)

Sunosi (solriamfetol) prior authorization will be approved if member meets the following criteria:

- Member is 18 years of age or older AND
- Member has diagnosis of either narcolepsy or obstructive sleep apnea (OSA) and is experiencing excessive daytime sleepiness AND
- Member does not have end stage renal disease AND
- If Sunosi is being prescribed for OSA, member has 1 month trial of CPAP AND
- Member has trial and failure of modafinil AND armodafinil AND one other agent in stimulant PDL class (Failure is defined as: lack of efficacy with 4 week trial, allergy, intolerable side effects, or significant drug-drug interaction.)

Methylphenidate ER (generic Metadate CD, ER, Ritalin LA) METHYLIN SUSPENSION (methylphenidate) **MYDAYIS ER** (dextroamphetamine/amphetamine) NUVIGIL (armodafinil) PROCENTRA (dextroamphetamine liquid) PROVIGIL (modafinil) QUILLICHEW (methylphenidate) QUILLIVANT XR suspension (methylphenidate) RELEXXII (methylphenidate ER) RITALIN IR (methylphenidate) RITALIN LA (methylphenidate ER (LA))STRATTERA (atomoxetine) SUNOSI (solriamfetol) ZENZEDI (dextroamphetamine)

Table 1: Indication and Age

- Approval for medically accepted indications not listed in Table 1 may be given with prior authorization review and may require submission of peer-reviewed literature or medical compendia showing safety and efficacy of the medication used for the prescribed indication. Medications may also receive approval for off-label use for fatigue associated with multiple sclerosis if meeting all other criteria for approval.
- Prior authorization will be required for doses that are higher than the FDA approved maximum doses.**

• Bolded Drug names are Preferred

Drug	Indications	
Stimulants – Immediate Release		
amphetamine sulfate (Evekeo™)	ADHD (Age \geq 3 years), Narcolepsy (Age \geq 6 years)	
armodafinil (Nuvigil®)	Excessive sleepiness associated with narcolepsy, OSA, and SWD for age ≥ 18 years	
dexmethylphenidate IR (Focalin®)	ADHD (Age ≥ 6 years)	

dextroamphetamine IR (Zenzedi TM)	ADHD (Age 3 to ≤ 16 years), Narcolepsy (Age ≥ 6 years)
dextroamphetamine solution (ProCentra TM)	ADHD (Age 3 to \leq 16 years), Narcolepsy (Age \geq 6 years)
methamphetamine (Desoxyn®)	ADHD (Age ≥ 6 years)
methylphenidate IR (Ritalin®)	ADHD (Age ≥ 6 years), Narcolepsy (Age ≥ 6 years), OSA
methylphenidate IR (Methylin®)	ADHD (Age \geq 6 years), Narcolepsy (Age \geq 6 years)
methylphenidate XR ODT (Contempla® XR ODT)	ADHD (Age ≥ 6 years)
mixed amphetamine salts IR (Adderall®)	ADHD (Age ≥ 3 years), Narcolepsy (Age ≥ 6 years)
modafinil (Provigil®)	Excessive sleepiness associated with narcolepsy, OSA, and SWD (Age ≥18 years)
Solriamfetol (Sunosi®)	Excessive sleepiness associated with narcolepsy, OSA (Age ≥18)
Stimula	nts – Extended-Release
amphetamine ER (Adzenys® XR-ODT and Adzenys® ER suspension)	ADHD (Age ≥ 6 years)
amphetamine ER (Dyanavel™ XR)	ADHD (Age ≥ 6 years)
Mixed-Amphetamine salts ER (generic Adderall XR)	ADHD (Age ≥ 6 years)
dexmethylphenidate ER (Focalin XR®)	ADHD (Age ≥ 6 years)
dextroamphetamine ER (Dexedrine®)	ADHD (Age 3 to \leq 16 years), Narcolepsy (Age \geq 6 years)
dextroamphetamine ER/amphetamine ER (Mydayis ER®)	ADHD (Age ≥ 13 years)
$lisd examfetamine \ dimesylate \ (Vyvanse @ \ capsule \ and \ Vyvanse @ \ chewable)$	ADHD (Age ≥ 6 years), Moderate to severe binge eating disorder in adults (Age ≥ 18 years
methylphenidate ER OROS (Concerta®)	ADHD (Age \geq 6 years), Narcolepsy (Age \geq 6 years), OSA
methylphenidate SR (Metadate ER®)	ADHD (Age ≥ 6 years), Narcolepsy (Age ≥ 6 years)
methylphenidate ER† (Metadate CD®)	ADHD (Age ≥ 6 years)
methylphenidate ER (QuilliChew™ ER)	ADHD (Age ≥ 6 years), Narcolepsy (Age ≥ 6 years)
methylphenidate ER (Quillivant XR®)	ADHD (Age ≥ 6 years), Narcolepsy (Age ≥ 6 years)
methylphenidate ER (Ritalin LA®)	ADHD (Age ≥ 6 years)
methylphenidate ER (Aptensio XR®)	ADHD (Age ≥ 6 years)
methylphenidate XR ODT (Contempla® XR ODT)	ADHD (Age ≥ 6 years)
Methylphenidate ER (Jornay PM ®)	ADHD (Age ≥ 6 years)
	Non-Stimulants
atomoxetine (Strattera®)	ADHD (Age ≥ 6 years)
clonidine ER (Kapvay TM)	ADHD (Age ≥ 6 years), Treatment of ADHD as adjunct to stimulants
guanfacine ER (Intuniv TM)	ADHD (Age ≥ 6 years), Treatment of ADHD as adjunct to stimulants

Table 2: Max Daily Dose

Drug	Maximum Daily Dose
ADDERALL ®	60 mg/day
ADDERALL XR®	60mg/day
ADZENYS XR-ODT® ADZENYS ER-SUSPENSION®	18.8 mg/day (age 6-12) 12.5 mg/day (age >13)
AMPHETAMINE SALTS	40 mg/day

CONCERTA®	54 mg/day or 72 mg/day >age 13
COTEMPLA XR-ODT®	51.8mg/day
DESOXYN ®	25mg/day

psoriasis, cystic acne, disorders of keratinization, neoplasms, or comedonal acne. These medications are only eligible for prior authorization approval for the aforementioned diagnoses.

Preferred topical acne agents prescribed for members ≤ 25 years of age may be approved for members with a diagnosis of acne vulgaris, psoriasis, cystic acne, disorders of keratinization, neoplasms, or comedonal acne. Diagnosis will be verified through automated verification (AutoPA) of the appropriate corresponding ICD-10 diagnosis code related to the indicated use of the medication.

In addition to the above criteria, preferred topical clindamycin and erythromycin products prescribed for members ≤ 25 may also be approved for a diagnosis of folliculitis, hidradenitis suppurativa, or perioral dermatitis (erythromycin only). Approval of preferred topical clindamycin and erythromycin products for other medically accepted indications for members ≤ 25 may be considered following clinical prior authorization review by a call center pharmacist.

Non-preferred topical products may be approved for members meeting all of the following criteria:

- Member has trialed/failed three preferred topical products with different mechanisms (i.e. tretinoin, antibiotic). Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction AND
- Prescriber verification that the medication is being prescribed for one of the following diagnoses: acne vulgaris, psoriasis, cystic acne, disorders of keratinization, neoplasms, or comedonal acne.

AMNESTEEM capsule	ABSORICA capsule	Preferred products may be approved for severe, recalcitrant nodulocystic acne for adults and children ≥ 12 years of age that have been unresponsive to conventional therapy.	
	ired for all agents	Professed products may be emproved for severe receleitment nodulesystic sone for edults and shildren	
	Therapeutic Drug Class: ACNE – ISOTRETINOIN -Effective 7/1/2020		
	ZIANA (clindamycin/tretinoin) gel		
	Tretinoin microspheres (all products)		
	Tretinoin gel (generic Atralin)		
	TAZORAC (tazarotene) cream, gel		
	Tazarotene cream		
	Sulfacetamide sodium/ sulfur cleanser, cream, cleanser kit, lotion, wash		
	Sulfacetamide sodium cleanser		
	ROSULA (sulfacetamide sodium/sulfur) cloths, wash		
	RETIN-A MICRO (tretinoin) (all products)		
	RETIN-A (tretinoin) (all products)		
	OVACE (sulfacetamide sodium) (all products)		
	ONEXTON (clindamycin/benzoyl peroxide)

	KLARON (sulfacetamide) lotion		
	FABIOR (tazarotene) foam		
	EVOCLIN (clindamycin) foam		
	Erythromycin / Benzoyl peroxide		
	Erythromycin gel, med swab		

CLARAVIS capsule	ABSORICA LD capsule Isotretinoin capsule MYORISAN capsule ZENATANE capsule	Non-preferred products may be approved for members meeting the following: • Member has trialed/failed two preferred agents (failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) AND • Member is an adult or child ≥ 12 years of age with severe, recalcitrant nodulocystic acne and has been unresponsive to conventional therapy.		
	Therapeutic Drug Class:	ANTI-PSORIATICS - Oral -Effective 1/1/2020		
No PA Required	PA Required			
SORIATANE ^{BNR} (acitretin) capsule	Acitretin capsule	Prior authorization for non-preferred oral agents will be approved with failure of two preferred anti- psoriatic agents, one of which must be a preferred oral agent. Failure is defined as lack of efficacy of a 4 week trial, allergy, intolerable side effects or significant drug-drug interaction.		
	Methoxsalen capsule, softgel			
	Methoxsalen Rapid			
	OXSORALEN-ULTRA (methoxsalen) capsule			
	Therapeutic Drug Class: A	NTI-PSORIATICS -Topical -Effective 1/1/2020		
No PA Required	PA Required			
Calcipotriene solution DOVONEX BNR (calcipotriene)	Calcipotriene cream, ointment Calcipotriene/betamethasone dp	Prior authorization for non-preferred topical agents will be approved with failure of two preferred topical agents. If non-preferred topical agent being requesting is a combination product, trial of two preferred agents must include a preferred combination agent. Failure is defined as lack of efficacy of a 4 week trial, allergy, intolerable side effects or significant drug-drug interaction.		
TACLONEX SCALP BNR	ointment Calcitriol ointment	Preferred and non-preferred products that contain a corticosteroid ingredient (such as betamethasone) will be limited to 4 weeks of therapy. Continued use will require one week of steroid-free time in		
(calcipotriene/betamethasone) susp	DUOBRII (halobetasol/tazarotene)	between treatment periods.		
TACLONEX OINTMENT BNR	lotion	Members with >30% of their body surface area affected may not use Enstilar (calcipotriene/betamethasone DP) foam or Taclonex (calcipotriene/betamethasone DP) ointment		
(calcipotriene/betamethasone)	ENSTILAR (calcipotriene/betamethasone) foam	products as safety and efficacy have not been established.		
	SORILUX (calcipotriene) foam			
	VECTICAL (calcitriol) ointment			
	Therapeutic Drug Class: ROSACEA AGENTS -Effective 7/1/2020			
No PA Required	PA Required			
Azelaic acid gel	FINACEA (azelaic acid) foam, gel	Prior authorization for non-preferred products in this class may be approved if member meets the following criteria:		

Metronidazole cream, gel, lotion	METROGEL (metronidazole) METROLOTION (metronidazole) MIRVASO (brimonidine) ORACEA (doxycycline)* tablet NORITATE (metronidazole) RHOFADE (oxymetazoline) ROSADAN Kit (metronidazole) SOOLANTRA (ivermectin)	 papules and pustules due to rosacea AND Prescriber attests that medication is not being used solely for cosmetic purposes AND Member has tried and failed two preferred agents of different mechanisms of action (Failure is defined as lack of efficacy with 4 week trial, allergy, intolerable side effects) *Oracea® (doxycycline monohydrate DR) may be approved if the member meets all of the following criteria: Member has taken generic doxycycline for a minimum of three months and failed therapy in the last 6 months. Failure is defined as: lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions AND Member has history of an adequate trial/failure (8 weeks) of 2 other preferred agents (oral or topical). Failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions AND Member is ≥ 18 years of age and has been diagnosed with rosacea with inflammatory lesions *TOPICAL STEROIDS – Effective 4/1/2020
	Therapeutic Drug Class	Low potency
No PA Required	PA Required	
Hydrocortisone (Rx) cream, ointment, lotion	ALA-CORT (hydrocortisone) cream ALA-SCALP (hydrocortisone) lotion	Non-preferred Low Potency topical corticosteroids may be approved following adequate trial and failure of two preferred agents in the Low Potency class (failure is defined as lack of efficacy with 4 week trial, allergy, intolerable side effects or significant drug-drug interactions).
DERMA-SMOOTHE-FSBNR (fluocinolone acetonide) oil	Alclometasone cream, ointment	
Desonide 0.05% cream, ointment	CAPEX (fluocinolone) shampoo	
Fluocinolone acetonide 0.01%	DESONATE (desonide) gel	
cream	Desonide lotion	
	DESOWEN (desonide) cream	
	Fluocinolone acetonide 0.01% body oil, 0.01% scalp oil, 0.01% solution	
	MICORT-HC (hydrocortisone) cream

		ANDROGENIC AGENTS -Effective 7/1/2020
PA Required for	or all agents in this class	Hymogonodotnonia on Duimony Hymogonodiam (may be cocondony to Vlinefelton Syndnems)
*ANDRODERM (testosterone) patch	ANDROGEL 1.62% (testosterone gel) pump	Hypogonadotropic or Primary Hypogonadism (may be secondary to Klinefelter Syndrome): Preferred products may be approved for members meeting the following:
* Testosterone gel 1.62% pump (generic Androgel) *Testosterone gel packet (generic Vogelxo)	ANDROGEL 1% (testosterone gel) ANDROID (methyltestosterone) capsule	 Member is a male patient > 16 years of age with a documented diagnosis of hypogonadotropic or primary hypogonadism OR ≥ 12 years of age with a diagnosis of hypogonadotropic or primary hypogonadism secondary to Klinefelter Syndrome (all other diagnoses will require manual review) AND Member has two documented low serum testosterone levels below the lower limit of normal
*Testosterone cypionate IM injection	DEPO-TESTOSTERONE (testosterone cypionate) IM injection FORTESTA (testosterone) gel	range for testing laboratory prior to initiation of therapy AND 3. Member does not have a diagnosis of breast or prostate cancer AND 4. Member does not have a palpable prostate nodule or prostate-specific antigen (PSA) > 4ng/mL (not required for members < 40 years of age) AND 5. Has baseline hematocrit < 50%
Injectable testosterone cypionate is a pharmacy benefit when selfadministered. Administration	JATENZO (testosterone undecanoate) capsules	Reauthorization Criteria (requests for renewal of a currently expiring prior authorization for a preferred product may be approved for members meeting the following criteria):
in an office setting is a medical benefit.	METHITEST (methyltestosterone) tablet	 Member is a male patient > 16 years of age with a documented diagnosis of hypogonadotropic or primary hypogonadism OR ≥ 12 years of age with a diagnosis of

- hypogonadotropic or primary hypogonadism $OR \ge 12$ years of age with a diagnosis of hypogonadotropic or primary hypogonadism secondary to Klinefelter Syndrome AND
- Serum testosterone is being regularly monitored (at least annually) to achieve total testosterone level in the middle tertile of normal reference range AND
- Member does not have a diagnosis of breast or prostate cancer AND
- Has hematocrit < 54%

Methyltestosterone capsule

TESTIM (testosterone) gel

capsule

STRIANT (testosterone) buccal

TESTRED (methyltestosterone)

Gender Transition/Affirming Hormone Therapy:

Preferred androgenic drugs will be approved for members meeting the following:

1. Female sex assigned at birth > 16 years of age AND

	Testosterone 1.62% packet (generic	2. Is undergoing female to male transition AND
	Androgel)	3. Has a negative pregnancy test prior to initiation AND
		4. Has baseline hematocrit < 50% or hematocrit < 54% for continuation of therapy.
	Testosterone gel (generic Fortesta,	••
	Testim, Vogelxo)	Non-Preferred Products:
	Testosterone gel pump (generic Axiron, Vogelxo)	Non-preferred topical androgenic agents may be approved for patients meeting the above criteria with trial and failed‡ therapy with two preferred topical androgen formulations.
	Testosterone enanthate IM injection	Non-preferred injectable androgenic agents may be approved for patients meeting the above criteria with trial and failed‡ therapy with a preferred injectable androgenic drug.
	VOGELXO (testosterone) gel	Prior authorization for oral androgen agents (tablet, capsule, buccal) may be approved if member has trialed and failed; therapy with a preferred topical agent AND testosterone
	XYOSTED (testosterone enanthate) SC injection	cypionate injection.
		‡Failure is defined as lack of efficacy with 8 week trial, allergy, intolerable side effects, contraindication to, or significant drug-drug interaction.
		For all agents and diagnoses, members < 16 years of age will require a manual prior authorization review by a pharmacist (with exception of members \geq 12 years of age with a diagnosis of hypogonadotropic or primary hypogonadism secondary to Klinefelter Syndrome).
Therapeu	tic Drug Class: BONE RESORPTIO	N SUPPRESSION AND RELATED AGENTS -Effective 10/1/2019
		Bisphosphonates
No PA Required	PA Required

	Repaglinide/metformin	
	Sodium-Glucose	e Cotransporter 2 inhibitors (SGLT-2is)
*Must meet eligibility criteria *FARXIGA (dapagliflozin) *INVOKANA (canagliflozin) *JARDIANCE (empagliflozin)	PA Required STEGLATRO (ertugliflozin)	*Approval for preferred products requires a 3-month trial of (or documented contraindication to) metformin therapy prior to initiation of therapy. Non-preferred products may receive approval following trial and failure with a 3-month trial of metformin AND a 3-month trial of two preferred products. Failure is defined as lack of efficacy with 3-month trial (e.g., hemoglobin A1C ≥ 7%) allergy, intolerable side effects, or a significant drug-drug interaction Maximum Dose: Prior authorization is required for all products exceeding maximum dose listed in product package labeling.
	SGLT-2 Inh	ibitors Combination with Metformin
	INVOKAMET (canagliflozin/metformin) SEGLUROMET (ertugliflozin/metformin) SYNJARDY (empagliflozin/metformin) XIGDUO XR (dapagliflozin/metformin)	Non-preferred products will be approved for members who have been stable on the two individual ingredients of the requested combination for 3 months.
	T	hiazolidinediones (TZDs)
No PA Required Pioglitazone	PA Required ACTOS (pioglitazone) AVANDIA (rosiglitazone)	Non-preferred TZDs will be approved after a member has failed a 3-month trial of metformin and failed a three month trial of a preferred product. Failure is defined as lack of efficacy (e.g., hemoglobin $A1C \ge 7\%$), OR the member cannot tolerate pioglitazone and metformin due to allergy, intolerable side effects, or a significant drug-drug interaction.
	Thiazolidine	diones Combination with Metformin
	PA Required ACTOPLUS MET (pioglitazone/metformin)	Non-preferred products will be approved for members who have been stable on the two individual ingredients of the requested combination for 3 months.

	ACTOPLUS MET XR (pioglitazone/metformin) AVANDAMET (rosiglitazone/metformin)	
	Pioglitazone/metformin	
		AGON, SELF-ADMINISTERED -Effective 4/1/2020
No PA Required (*Must meet eligibility criteria)	PA Required BAQSIMI (glucagon) Nasal Spray	*Gvoke (glucagon) may be approved following trial and failure of GlucaGen (glucagon) OR glucagon emergency kit (failure is defined as allergy to ingredients in product, intolerable side effects, or inability to administer dosage form).
GLUCAGEN HYPOKIT (glucagon)		Non-preferred products may be approved if the member has failed treatment with Gvoke (glucagon) AND one other preferred product (failure is defined as allergy to ingredients in product, intolerable side effects, or contraindication to dosing form).
Glucagon Emergency Kit		Quantity limit: 2 doses per year unless used / damaged / lost
GVOKE (glucagon)*		
		GROWTH HORMONES -Effective 4/1/2020
No PA Required (if diagnosis and dose met)	PA Required	All preferred products may be approved if the member has one of the qualifying diagnoses listed below (diagnosis may be verified through AutoPA) AND if prescription does not exceed limitations for maximum dosing (Table 1).
GENOTROPIN	HUMATROPE	N. C. I.C. ALV.
NORDITROPIN	NUTROPIN AQ OMNITROPE	 Non-preferred Growth Hormones may be approved if the following criteria are met: Member failed treatment with one preferred growth hormone product (failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions). Member has a qualifying diagnosis: Prader-Willi
	SAIZEN	Chronic renal insufficiency/failure requiring transplantation (defined as Creatinine Clearance < 30mL/min)
	SEROSTIM	 Turner's Syndrome Hypopituitarism: as a result of pituitary disease, hypothalamic disease, surgery,
	ZOMACTON	radiation therapy or trauma verified by one of the following: Has failed at least one GH stimulation test (peak GH level < 10 ng/mL)
	ZORBTIVE	 Has at least one documented low IGF-1 level (below normal range for patient's age – refer to range on submitted lab document) Has deficiencies in ≥ 3 pituitary axes (i.e. TSH, LH, FSH, ACTH, ADH) Cachexia associated with AIDS Noonan Syndrome Short bowel syndrome Neonatal symptomatic growth hormone deficiency (limited to three month PA approval)
		Prescription does not exceed limitations for maximum dosing (Table 1) based on prescriber submission/verification of patient weight from most recent clinical documentation

Medication	Pediatric Max	Adult Max Dosing
	Dosing	$(age \ge 18 \text{ years})$
	(age < 18 years)	
Genotropin	0.33 mg/kg/week	0.08 mg/kg/week
Humatrope	0.375	0.0875 mg/kg/week
_	mg/kg/week	
Norditropin Flexpro	0.47 mg/kg/week	0.112 mg/kg/week
Nutropin AQ Nuspin	0.357	0.175 mg/kg/week for ≤35 years of age
	mg/kg/week	0.0875 mg/kg/week for >35 years of age
Omnitrope	0.33 mg/kg/week	0.08 mg/kg/week
Saizen	0.18 mg/kg/week	0.07 mg/kg/week
Serostim	Not Indicated	42 mg/week for cachexia with HIV only (
		combination with antiretroviral therapy)
Zomacton	0.375	0.0875 mg/kg/week
	mg/kg/week	
Zorbtive	Not Indicated	8 mg/28 days for short bowel syndrome
		only

Emend (aprepitant) TriPack or **Emend (aprepitant) powder kit** prior authorization may be approved for members who have trialed and failed one preferred product AND one other anti-emetic

(for example: prochlorperazine, metoclopramide, promethazine) AND Emend (aprepitant) capsule.

Failure is defined as lack of efficacy with 14-day trial, allergy, intolerable side effects, or significant

VII. Gastrointestinal

Therapeutic Drug Class: ANTI-EMETICS -Effective 1/1/2020		
No PA Required	PA Required	Non-preferred products may be approved for members who have trialed and failed treatment with one
Ondansetron ODT, tablet	AKYNZEO (netupitant/palonosetron) capsule	preferred product AND one other anti-emetic (for example: prochlorperazine, metoclopramide, promethazine). Failure is defined as lack of efficacy with 14-day trial, allergy, intolerable side effects, or significant drug-drug interaction.
Ondansetron oral solution* (members under 5 years)	ANZEMET (dolasetron) tablet	*Ondansetron solution may be approved for members < 5 years and those members ≥ 5 years of age with a feeding tube.
TRANSDERM-SCOP (scopolamine) BNR	Aprepitant capsule BONJESTA ER (doxylamine/pyridoxine) tablet	Pyridoxine tablet AND doxylamine tablet may be approved for members who have a diagnosis of nausea and vomiting of pregnancy (NVP). Approval will be given for 9 months.

drug-drug interaction.

DICLEGIS DR

(doxylamine/pyridoxine) tablet

Doxylamine 25mg (OTC)

Diclegis (doxylamine/pyridoxine) DR tablet or Bonjesta (doxylamine/pyridoxine) ER tablet may be approved for 9 months for members who meet the following criteria:

- Has nausea and vomiting associated with pregnancy AND
- Has failed *7-day trial of OTC formulation of pyridoxine (Vitamin B6) at maximally tolerated dose of up to 200mg daily AND
- Has failed* 7-day combination trial of OTC formulations of doxylamine and pyridoxine (Vitamin B6) at maximum daily doses of doxylamine 40mg and pyridoxine 40mg AND
- Has failed* 7-day trial of alternate antihistamine (diphenhydramine, dimenhydrinate, meclizine) OR
- Has failed* 7-day trial of dopamine antagonist (metoclopramide, prochlorperazine, promethazine) **OR**
- Has failed 7-day trial of serotonin antagonist (ondansetron, granisetron). *Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction.

Dronabinol prior authorization may be approved for members meeting above non-preferred criteria.OR via AutoPA for members with documented HIV diagnosis.

Chenodal (chenodiol) and Actigall (ursodiol) may be approved for members who meet the following criteria: Ursodiol capsule ACTIGALL (ursodiol) capsule Member > 18 years of age AND Member has tried and failed therapy with a 12 month trial of a preferred ursodiol (failure is Ursodiol tablet CHENODAL (chenodiol) tablet defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions). CHOLBAM (cholic acid) capsule **Cholbam** (cholic acid) may be approved for members who meet the following criteria: OCALIVA (obeticholic acid) tablet Bile acid synthesis disorders: Member must be greater than 3 weeks old in age AND URSO (ursodiol) tablet Member has a diagnosis for bile acid synthesis disorder due to single enzyme defect (Single Enzyme-Defect Disorders: Defective sterol nucleus synthesis, 3β-URSO FORTE (ursodiol) tablet hydroxy-Δ-c27-steroid oxidoreductase deficiency, AKR1D1 deficiency, CYP7A1 deficiency, Defective side-chain synthesis, CYP27A1 deficiency (cerebrotendinous xanthomatosis), 2-methylacyl-CoA racemase deficiency (AMACR), 25hydroxylation pathway (Smith-Lemli-Opitz). Peroxisomal disorder including Zellweger spectrum disorders: Member must be greater than 3 weeks old in age AND Member has diagnosis of peroxisomal disorders (PDs) including Zellweger spectrum disorders AND

		 Member has manifestations of liver disease, steatorrhea or complications from decreased fat-soluble vitamin absorption. Ocaliva (obeticholic acid), Urso (ursodiol), and Urso Forte (ursodiol) may be approved for members meeting the following criteria: Member is ≥ 18 years of age AND Medication is prescribed by or in consultation with a gastroenterologist, hepatologist, or liver transplant provider AND Member has the diagnosis of Primary Biliary Cholangitis as evidenced by two of the following at the time of diagnosis:
	Therapeutic Drug Class:	GI MOTILITY, CHRONIC -Effective 10/1/2019
PA Required	for all agents in this class	All GI Motility Agents will only be approved for FDA labeled indications and up to FDA approved
	1	maximum doses (listed below):
AMITIZA (lubiprostone)	Alosetron	Preferred agents will be approved if the member meets the following criteria: • Has diagnosis of Irritable Bowel Syndrome – Constipation (IBS-C), Chronic Idiopathic
LINZESS (linaclotide)	LOTRONEX (Alosetron)	Constipation (CIC), or Opioid Induced Constipation (OIC) in patients with opioids prescribed for noncancer pain AND
MOVANTIK (naloxegol)	MOTEGRITY (prucalopride)	Member does not have a diagnosis of GI obstruction AND
	RELISTOR (Methylnaltrexone bromide) tablet and syringe	 For indication of OIC, member opioid use must exceed 4 weeks of treatment For indications of CIC, OIC, IBS-C; member must have documentation of adequate trial of two or more over-the-counter motility agents (for example; polyethylene glycol, docusate,
	SYMPROIC (Naldemedine)	bisocodyl) (Failure is defined as a lack of efficacy for a 7 day trial, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions)
	TRULANCE (plecanatide)	o If the member cannot take oral medications, then the member must fail a 7-day trial with a nonphosphate enema (docusate or bisocodyl enema)
	VIBERZI (eluxadoline)	 For indication of IBS-D; must have documentation of adequate trial with loperamide AND dicyclomine OR hyoscamine (Failure is defined as a lack of efficacy for a 7 day trial, allergy, intolerable side effects, contraindication to, or significant drug-drug interactions)
		Non-preferred agents may be approved if the member meets the following criteria: • Member meets all listed criteria for preferred agents AND • Member has trialed and failed two preferred agents • If indication OIC caused by methadone, then non-preferred agent may be approved after trial of Movantik (Failure is defined as a lack of efficacy for a 7 day trial,

allergy, intolerable side effects, contraindication to, or significant drug-drug interactions) $\boldsymbol{A}\boldsymbol{N}\boldsymbol{D}$

o Member meets additional criteria for the agents listed below

Viberzi® (eluxadoline) will be approved for members who meet the following criteria:

- Has diagnosis of Irritable Bowel Syndrome Diarrhea (IBS-D) AND
- Member has a gallbladder AND
- Member does not have severe hepatic impairment (Child-Pugh C), history of severe
 constipation, known mechanical gastrointestinal obstruction, biliary duct obstruction, history
 of pancreatitis or structural disease of the pancreas AND
- Member does not drink more than 3 alcoholic drinks per day AND

Lotronex® (alesotron) and Alesotron will be approved for members who meet the following criteria:

- Member is a female with Irritable Bowel Syndrome Diarrhea (IBS-D) with symptoms lasting 6 months or longer AND
- Member does not have severe hepatic impairment (Child-Pugh C), history of severe constipation or ischemic colitis, hypercoagulable state, Crohn's disease or ulcerative colitis, or known mechanical gastrointestinal obstruction

Medication	FDA approved indication	FDA Max Dose
Amitiza (lubiprostone)	IBS-C (females only), CIC, OIC (not caused by methadone)	48mcg/day
Linzess (linaclotide)	IBS-C, CIC	290mcg/day
Movantik (naloxegol)	OIC	25mg/day
Viberzi (eluxadoline)	IBS-D	200mg/day
Alosetron	OIC	2mg/day (females only)
Relistor syringe (methylnaltrexone)	OIC	12mg SQ/day
Relistor oral (methylnaltrexone)	OIC	450mg/day
Lotronex (alosetron)	IBS-D (females only)	2mg/day (females only)
Symproic (Naldemedine)	OIC	0.2mg/day
Trulance (plecanatide)	CIC, IBS-C	3mg/day
Motegrity (prucalopride)	CIC	2mg/day

 $CIC-chronic\ idiopathic\ constipation,\ OIC-opioid\ induced\ constipation,\ IBS-irritable\ bowel\ syndrome,\ D-diarrhea\ predominant,\ C-constipation\ predominant$

Therapeutic Drug Class: HEMORRHOIDAL AND RELATED ANORECTAL AGENTS - Effective 4/1/2020		
No PA Required	PA Required	
CORTIFOAM (hydrocortisone) aerosol	ANA-LEX (hydrocortisone-lidocaine)	Non-preferred products may be approved following trial and failure of therapy with 3 preferred products (failure is defined as lack of efficacy with 4 week trial, allergy, intolerable side effects or
Hydrocortisone enema	ANALPRAM HC (hydrocortisone- pramoxine) cream	significant drug-drug interactions).
Hydrocortisone 25 mg suppository	ANUCORT-HC (hydrocortisone) suppository	 Rectiv (nitroglycerin) ointment may be approved if meeting the following: Member has a diagnosis of anal fissure AND Prescriber attests that member has trialed and maximized use of appropriate supportive
Hydrocortisone 2.5% cream with applicator	ANUSOL-HC (hydrocortisone) suppository, cream	therapies including sitz bath, fiber, topical analgesics (such as lidocaine), and stool softeners/laxatives.
Hydrocortisone-Pramoxine 1%-1%, 2.5%-1% cream	COLOCORT (hydrocortisone) enema	
Lidocaine-Hydrocortisone 3-	CORTENEMA (hydrocortisone) enema	
0.5% cream	Hydrocortisone 30 mg suppository, 1% cream with applicator	
PROCTOFOAM (hydrocortisone-pramoxine)	Lidocaine-Hydrocortisone 3-0.5% cream kit	
PROCTO-MED HC (hydrocortisone) 2.5% cream	Lidocaine-Hydrocortisone 3-2.5% gel	
	MICORT-HC (hydrocortisone) cream	
PROCTO-PAK (hydrocortisone) 1% cream	PROCORT (hydrocortisone- pramoxine) cream	
PROCTOSOL-HC 2.5% (hydrocortisone) cream	PROCTOCORT (hydrocortisone) suppository	
PROCTOZONE-HC 2.5% (hydrocortisone) cream	RECTIV (nitroglycerin) ointment	
Therapeutic Drug Class: PANCREATIC ENZYMES -Effective 1/1/2020		
No PA Required	PA Required	
CREON (pancrelipase) capsule	PANCREAZE (pancrelipase) capsule	Non-preferred products will be approved for members who have failed an adequate trial (4 weeks) with at least two preferred products. (Failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interaction.)
ZENPEP (pancrelipase) capsule	PERTZYE (pancrelipase) capsule	Grandfathering: Members currently stabilized on a Non-preferred pancreatic enzyme can receive
Capsure	VIOKACE (pancrelipase) tablet	approval to continue on that agent for one year if medically necessary.

	Therapeutic Drug Class: F
No PA Required	PA Required
Esomeprazole capsule (generic Nexium) RX	ACIPHEX (rabeprazole) tablet, sprinkle capsule
Lansoprazole capsules (generic Prevacid) RX	DEXILANT (dexlansoprazole) capsule
NEXIUM (esomeprazole)	Esomeprazole strontium DR capsule
packets	Esomeprazole mag capsule OTC
Omeprazole capsule	Lansoprazole capsule OTC, ODT RX
Pantoprazole tablet	NEXIUM (esomeprazole) capsule (RX)
PREVACID Solutab ^{BNR} (lansoprazole) (members < 2)	Omeprazole/Na bicarbonate capsule, packet
	Omeprazole 20mg tablet, ODT (OTC)
	PREVACID (lansoprazole) capsule
	PRILOSEC (omeprazole) suspension
	PROTONIX (pantoprazole) tablet, suspension
	Rabeprazole (generic Aciphex) tablet
	ZEGERID (omeprazole/Na bicarbonate) capsule, packet

PROTON PUMP INHIBITORS -Effective 1/1/2020

For members treating GERD symptoms that are controlled on PPI therapy, it is recommended that the dose of the PPI be re-evaluated or step-down with an H2 blocker (such as famotidine or ranitidine) be trialed in order to reduce long-term PPI use.

Prior authorization for non-preferred proton pump inhibitors may be approved if all of the following criteria are met:

- Member has a qualifying diagnosis (below) AND
- Member has trailed and failed therapy with three preferred agents within the last 24 months. (Failure is defined as: lack of efficacy following 4 week trial, allergy, intolerable side effects, or significant drug-drug interaction) **AND**
- Member has been diagnosed using one of the following diagnostic methods:
 - Diagnosis made by GI specialist
 - Endoscopy
 - o X-ray
 - Biopsy
 - Blood test
 - Breath Test

Qualifying Diagnoses:

Barrett's esophagus, duodenal ulcer, erosive esophagitis, gastric ulcer, GERD, GI Bleed, H. pylori infection, hypersecretory conditions (Zollinger-Ellison), NSAID-induced ulcer, pediatric esophagitis, requiring mechanical ventilation, requiring a feeding tube

Quantity Limits:

All agents will be limited to once daily dosing except when used for the following diagnoses: Barrett's esophagus, GI Bleed, H. pylori, hypersecretory conditions (Zollinger-Ellison), or Spinal Cord Injury patients with associated acid reflux.

Adult members with GERD on once daily, high-dose PPI therapy who continue to experience symptoms may receive initial prior authorization approval for a 4-week trial of twice daily, high-dose PPI therapy. Continuation of the twice daily dosing regimen for GERD beyond 4 weeks will require additional prior authorization approval verifying adequate member response to the dosing regimen and approval may be placed for one year. If a member with symptomatic GERD does not respond to twice daily, high-dose PPI therapy, this should be considered a treatment failure.

Pediatric members (< **18 years of age**) on once daily dosing of a PPI who continue to experience symptoms may receive one-year prior authorization approval for twice daily PPI therapy.

Age Limits:

Nexium 24H and Zegerid will not be approved for members less than 18 years of age.

Prevacid Solutab will be approved for members ≤ 2 years of age OR for members ≥ 2 years of age with a feeding tube.

Therapeutic Drug Class: H. PYLORI TREATMENTS -Effective 1/1/2020		
	PA Required OMECLAMOX-PAK (amoxicillin/omeprazole/clarithromycin) PREVPAC (amoxicillin/lansoprazole/	H. Pylori treatments should be used as individual products unless one of the individual products is not commercially available then a PA for the combination product will be given.
	clarithromycin) Amoxicillin/lansoprazole/ clarithromycin	
	PYLERA (bismuth subcitrate/metronidazole/tetracycline)	
	TALICIA (omeprazole/amoxicillin/rifabutin)	
No PA Required	PA Required	AATIVE COLITIS AGENTS- Oral -Effective 1/1/2020
APRISO ER BNR (mesalamine) capsule	ASACOL HD (mesalamine) tablet	Prior authorization for non-preferred oral formulations will require trial and failure of two preferred oral products with different active ingredients AND a preferred rectal product. If inflammation is not within reach of topical therapy, trial of preferred rectal product is not required. Failure is defined as
LIALDA (mesalamine DR) BNR tablet	AZULFIDINE (sulfasalazine) Entab, tablet Balsalazide disodium capsule	lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction. Uceris (budesonide) tablet: If the above criteria is met, Uceris (budesonide) tablet prior authorization will be approved for 8 weeks. Further prior authorization may be approved if 7 days of
PENTASA (mesalamine) capsule	Budesonide DR tablet	steroid-free time has elapsed and member continues to meet the above criteria.
Sulfasalazine IR and DR tablet	COLAZAL (balsalazide) capsule DELZICOL DR (mesalamine) capsule	
	DIPENTUM (olsalazine) capsule GIAZO (balsalazide) tablet	
	Mesalamine DR (generic Asacol HD, Lialda) tablet	
	Mesalamine capsule (generic Apriso ER) UCERIS (budesonide) tablet	

Therapeutic Drug Class: ULCERATIVE COLITIS AGENTS- Rectal -Effective 1/1/2020		
No PA Required	PA Required	
Mesalamine suppository (generic Canasa)	CANASA (mesalamine) suppository	Prior authorization for non-preferred rectal formulations will require trial and failure of one preferred rectal formulation and one preferred oral formulation (Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction).
	Mesalamine enema, kit	
	SF ROWASA (mesalamine)	Uceris (budesonide) foam: If the above criteria is met, Uceris (budesonide) foam prior authorization will be approved for 6 weeks. Further prior authorization may be approved if 7 days of steroid-free time has elapsed and member continues to meet the above criteria.
	ROWASA (mesalamine w/cleansing wipes)	
	UCERIS (budesonide) foam	

VIII. Hematological

v III. Hematorogical			
	Therapeutic Drug Class: ANTI-COAGULANTS- Oral -Effective 10/1/2019		
No PA Required	PA Required	Bevyxxa (betrixaban) may be approved if all the following criteria have been met:	
Warfarin	BEVYXXA (betrixaban)	 The member has trialed and failed therapy with two preferred agents. (Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) AND Member is not on dialysis AND 	
PRADAXA (dabigatran)	COUMADIN (warfarin)	• The member is need of prophylaxis for DVT following hospitalization for an acute medical illness who are at risk for thromboembolic events due to limited mobility AND	
XARELTO (rivaroxaban) 10 mg, 15 mg, 20 mg tablet	ELIQUIS (apixaban)	The member does not have a mechanical prosthetic heart valve	
XARELTO (rivaroxaban) dose	SAVAYSA (edoxaban)	Eliquis (apixaban) may be approved if the following criteria have been met: • The member is on dialysis OR	
pack	XARELTO (rivaroxaban) 2.5 mg tablet	 The member has failed therapy with two preferred agents. Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction. If the member is on dialysis, trial and failure of preferred agents is not required AND The member has a diagnosis of deep vein thrombosis (DVT), pulmonary embolism (PE) OR The member is in need of prophylaxis for DVT following knee or hip replacement surgery OR The member has a diagnosis of non-valvular atrial fibrillation AND The member does not have a mechanical prosthetic heart valve 	
		 Savaysa (edoxaban) may be approved if all the following criteria have been met: The member has failed therapy with two preferred agents. (Failure is defined as: lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction) AND Member is not on dialysis AND Member does not have CrCl > 95 mL/min AND The member has a diagnosis of deep vein thrombosis (DVT), pulmonary embolism (PE) OR The member has a diagnosis of non-valvular atrial fibrillation AND The member does not have a mechanical prosthetic heart valve 	

	The was out in Dance Change A No	 Xarelto 2.5mg (rivaroxaban) may be approved for members meeting all of the following criteria: Xarelto 2.5mg is being prescribed to reduce major CV events in members diagnosis of chronic coronary artery disease (CAD) or peripheral artery disease AND Xarelto 2.5mg is being taken twice daily and in combination with aspirin 75-100mg daily AND Member must not be receiving dual antiplatelet therapy, other non-aspirin antiplatelet, or other oral anticoagulant AND Member must not have had an ischemic, non-lacunar stroke within the past month AND Member must not have had a hemorrhagic or lacunar stroke at any time Continuation of Care: Members with current prior authorization approval on file for a non-preferred oral anticoagulant medication may continue to receive approval for that medication.
No PA Required	PA Required	TI-COAGULANTS- Parenteral -Effective 10/1/2019 Non-preferred parenteral anticoagulants will be approved if member has trial and failure of one
Enoxaparin syringe	ARIXTRA (fondaparinux) syringe	preferred agent. Failure is defined as lack of efficacy, allergy, intolerable side effects, or significant drug-drug interaction
LOVENOX BNR (enoxaparin) 300mg/3ml vial	Enoxaparin 300mg/3ml vial (generic Lovenox)	ARIXTRA® (fondaparinux) will be approved if the following criteria have been met: ■ Member is 18 years of age or older AND ■ Member has a CrCl > 30 ml/min AND
	Fondaparinux (generic Arixtra)	 Member weighs > 50 kg AND Member has a documented history of heparin induced-thrombocytopenia OR
	FRAGMIN (dalteparin) vial, syringe	Member has a contraindication to enoxaparin
	LOVENOX (enoxaparin) syringe	Grandfathering: Members currently stabilized on fondaparinux (Arixtra) and dalteparin (Fragmin) may receive prior authorization approval to continue on that medication.
	Therapeutic Drug Cl	ass: ANTI-PLATELETS -Effective 1/1/2020
No PA Required	PA Required	
Brand/generic changes	EFFIENT (prasugrel) tablet	Patients taking Brilinta (ticagrelor) must also be taking a maintenance dose of aspirin not exceeding 100 mg/day.
effective 05/29/20	PLAVIX (clopidogrel) tablet	Ticlopidine should only be considered for patients who can be monitored for neutropenia and thrombocytopenia during the first three months of therapy.
AGGRENOX (ASA/dipyridamole) capsule	PLETAL (cilostazol)	Zontivity (vorapaxar) will be approved for patients with a diagnosis of myocardial infarction or
ASA/dipyridamole ER capsule	Ticlopidine tablet	peripheral artery disease without a history of stroke, transient ischemic attack, intracranial bleeding, or active pathological bleeding. Patients must also be taking aspirin and/or clopidogrel
BRILINTA (tigacrelor) tablet	ZONTIVITY (vorapaxar) tablet	concomitantly.
Cilostazol tablet		Non-preferred products without criteria will be reviewed on a case by case basis.
Clopidogrel tablet		
	1

No PA Required	PA Required	Non-preferred products may be approved if meeting the following criteria:
Montelukast tab, chewable	ACCOLATE (zafirlukast) tablet	 Member has trialed and failed treatment with one preferred product (failure is defined as lack of efficacy, allergy, intolerable side effects or significant drug-drug interactions) AND Member has a diagnosis of asthma.
	SINGULAIR (montelukast) tablet,	
	chewable tab, granules	Montelukast granules may be approved if a member has tried and failed montelukast chewable tablets AND has difficulty swallowing.
	Montelukast granules	
	Zafirlukast tablet	
	ZYFLO (zileuton ER) tablet	
	Therapeutic Drug Class: MUl	LTIPLE SCLEROSIS AGENTS -Effective 4/1/2020
Disease Modifying Therapies		
No PA Required (unless indicated*)	PA Required	*Second-line preferred agents (Gilenya , Tecfidera , Aubagio) may be approved if meeting the following:
(umess mulcateu·)		 Member has documented diagnosis of multiple sclerosis made by neurologist in the last 3
AVONEX (interferon beta 1a) injection	COPAXONE (glatiramer) 40MG injection	years OR member has history of diagnosis made by a neurologist > 3 years ago but is naïve to all medications indicated for the treatment of relapsing forms of multiple sclerosis AND
BETASERON (interferon beta 1b) injection	EXTAVIA (interferon beta 1b) vial	 Documentation is provided by prescribing neurologist (or name of neurologist consulted may be indicated) supporting marked functional decline as demonstrated by <u>two</u> of the following: MRI, EDSS scale, or medical chart notes supporting increased burden of disease AND
COPAXONE ^{BNR} (glatiramer)	GLATOPA (glatiramer) injection	 Prescriber attests to shared decision making with respect to risks versus benefits of medical treatment AND
20MG injection	Glatiramer 20mg, 40mg injection	Additional safety criteria for prescribed agent are met (Table 1).
*AUBAGIO (teriflunomide)	GILENYA (fingolimod) 0.25 mg, 0.5 mg tablet (7-ct box)	For members NOT meeting above criteria, second-line preferred agents (Gilenya, Tecfidera, Aubagio) may be approved if meeting all of the following:
tablet**2nd Line**		 Member has a diagnosis of a relapsing form of multiple sclerosis AND
*GILENYA ^{BNR} (fingolimod) 0.5 mg tablet (30-ct	MAVENCLAD (cladribine) tablet	Medication is being prescribed by a neurologist or in conjunction with consultation by a neurologist AND
bottle)**2nd Line**	MAYZENT (siponimod) tablet, pack	Member has trial and failure with Copaxone OR a preferred interferon product (failure defined as intolerable side effects, drug-drug interaction, or lack of efficacy) AND
*TECFIDERA (dimethyl	PLEGRIDY (peg-interferon beta 1a)	 MRI results show presence of new spinal lesions, cerebellar lesions, brain stem lesions, or change in brain atrophy AND
fumarate) tablet **2nd Line**		 On clinical exam, member has signs and symptoms consistent with functional limitations lasting one month or longer AND
	REBIF (interferon beta 1a) injection	• Additional safety criteria for prescribed agent are met (Table 1).
	VUMERITY (diroximel) capsules	Non-Preferred Products:
		Mayzent (simponimod), Mavenclad (cladribine), and Vumerity (dioroxemel fumerate) must meet specific criteria listed for those agents below. All other non-preferred products may be approved following trial and failure with three preferred products (failure is defined as lack of efficacy,

allergy, intolerable side effects, or significant drug-drug interactions).

Copaxone (glatiramer) 40mg may be approved for members who have severe intolerable injection site reactions to <u>brand</u> Copaxone 20mg (such as pain requiring local anesthetic, oozing, lipoatrophy, swelling, or ulceration).

Mayzent (simponimod) may be approved if meeting all of the following:

- Medication is being prescribed by a neurologist or in conjunction with consultation by a neurologist AND
- Member has a diagnosis of a relapsing form of multiple sclerosis AND
- Member does not have diagnosis of macular degeneration AND
- Member has baseline Expanded Disability Status Scale (EDSS) score of 3.0-6.5 AND
- Member has no evidence of relapse in the 3 months preceding initiation of therapy AND
- Member has previous trial and failure of Gilenya (fingolimod) therapy (failure is defined as lack of efficacy with 3 month trial, allergy, intolerable side effects, or significant drug-drug interaction) AND
- Additional safety criteria for prescribed agent are met (Table 1) AND
- Initial authorization will be limited to 3 months. Continuation (12 month authorization) will require documentation of EDSS reduction of 1.0 point from baseline (or reduction of 0.5 points if baseline EDSS is 5.5-6.5).

Mavenclad (cladribine) may be approved if meeting all of the following:

- Medication is being prescribed by a neurologist or in conjunction with consultation by a neurologist AND
- Member has a diagnosis of a relapsing form of multiple sclerosis AND
- Member has history of ≥ 1 relapse in the 12 months preceding initiation of therapy AND
- Member has previous trial and failure of three other therapies for relapsing forms of multiple sclerosis (failure is defined as lack of efficacy with 3 month trial, allergy, intolerable side effects, or significant drug-drug interactions) AND
- Additional safety criteria for prescribed agent are met (Table 1).

Vumerity (diroximel fumarate) may be approved if meeting all of the following:

- Medication is being prescribed by a neurologist or in conjunction with consultation by a neurologist AND
- Member has a diagnosis of a relapsing form of multiple sclerosis AND
- Additional safety criteria for prescribed agent are met (Table 1) AND
- Member has previous trial and failure of Tecfidera (dimethyl fumarate) therapy (failure is defined as lack of efficacy with 3 month trial, allergy, intolerable side effects [if GI adverse events, must meet additional criteria below], or significant drug-drug interactions) AND
- If Vumerity (diroximel fumarate) is being prescribed due to GI adverse events with Tecfidera (dimethyl fumarate) therapy (and no other reason for failure of Tecfidera is given), then the following additional criteria must be met:
 - Member has trialed a temporary dose reduction of Tecfidera (with maintenance dose being resumed within 4 weeks) AND
 - Member has trialed taking Tecfidera with food AND
 - GI adverse events remain significant despite maximized use of gastrointestinal symptomatic therapies (such as calcium carbonate, bismuth subsalicylate, PPIs, H2

<u></u>	
	 blockers, anti-bloating/anti-constipation agents, anti-diarrheal, and centrally acting anti-emetics) AND Initial authorization will be limited to 3 months. Continuation (12 month authorization) will require documentation of clinically significant reduction in GI adverse events with Vumerity (diroximel fumarate) therapy.
	Table 1: Safety Criteria for Select Agents
Tecfide (dimeth fumera Aubag (teriflum	Member has CBC with differential conducted within the 6 months prior to initiating therapy Member has no active infections AND For female members of child-bearing age, have negative pregnancy test at baseline and are using a highly effective form of contraceptive when appropriate (such as long-acting reversible contraception) AND Member has transaminase and bilirubin levels with ALT < 2 times the upper limit of normal within the 6 months prior to initiating
Gileny	The most mas no active intertions in the
(fingoli	 Member does not have instory of hyocardia infraction, unstable angina, stroke, transient ischemic attack, decompensated heart failure requiring hospitalization, or New York Heart Association Class III-IV heart failure within six months of initiating therapy AND Member does not have a history or presence of Mobitz Type II 2nd degree or 3rd degree AV block or sick sinus syndrome (unless patient has a pacemaker) AND Member has a baseline QTc interval < 500 ms prior to starting therapy AND Member is not receiving treatment with a Class Ia or Class III antiarrhythmic medication AND Member has had an ophthalmologic evaluation (ocular coherence test) prior to starting therapy with follow-up within 3-4 months after therapy is initiated AND Member has had baseline CBC with differential and liver function tests conducted.
Mayze (simpo	 Member does not have one of the following contraindications: CYP2C9*3/*3 genotype OR Has experienced (in the last 6 months) myocardial infarction, unstable angina, stroke, TIA, decompensated heart failure requiring hospitalization, or Class III or IV heart failure OR Presence of Mobitz type II second-degree, third-degree AV block,

Mavenclad (cladribine)	or sick sinus syndrome (unless patient has a functioning pacemaker) AND Member has baseline QTc interval < 500 ms prior to starting therapy AND Member has no active infections AND Member has not had hypersensitivity reaction to Gilenya (fingolimod) AND Baseline CBC with differential and liver function tests are conducted prior to initiating therapy. Maximum Dose: 60mg per 30 days Member has negative pregnancy test within 30 days of request for Mavenclad AND Men and women of childbearing potential must have plan to use effective contraception during and 6-months after therapy AND Member does not have current evidence of malignancy AND Member has CBC with differential drawn prior to, during, and after treatments with Mavenclad due to risk of lymphopenia and hematologic
Vumerity (diroximel fumarate)	 Lymphocytes must be within normal limits before initiating the first treatment course and must be ≥ 800 cells per microliter before initiating the second treatment course AND Member is not currently taking immunosuppressive or myelosuppressive therapy AND Member has no active infections AND Member has liver function tests drawn prior to first and second treatment course due to potential for liver injury. Maximum Dose: Not exceeding 3.5mg/kg during full treatment course Member has not had hypersensitivity reaction or angioedema as a result of Tecfidera (dimethyl fumerate) therapy AND Member has no active infections AND A CBC with differential will be conducted within the six months prior to initiating therapy AND Member has liver function tests drawn prior to treatment course due to potential for liver injury. Maximum Dose: 924mg per day
	mbers currently stabilized on a preferred second-line product or a non-preferred approval to continue therapy with that agent.

	Sympt	tom Management Therapies
	PA Required AMPYRA ER (dalfampridine) Dalfampridine ER	 Ampyra (dalfampridine) prior authorization for a 3 month supply may be approved if all of the following criteria are met: Member has a diagnosis of MS; Member is ambulatory and has established a baseline which is defined as ambulating between 8-45 seconds Timed 25-foot Walk (T25FW) assessment OR has established a baseline activities of daily living (ADL) AND Member has no history of seizure disorder AND Member has no history of moderate to severe renal dysfunction (CrCl > 50 ml/min) AND Prescriber is a neurologist or is prescribed in conjunction with a neurologist AND The prescribed dose does not exceed 10 mg twice daily. Extended coverage of Ampyra (dalfampridine) for up to one year may be approved if documentation shows improvement in ambulation (measured by T25FW assessment) or improvement in ADLs after three months of therapy.
7.4		ETED IMMUNE MODULATORS -Effective 1/1/2020
Must meet eligibility criteria*	PA Required	Eligibility Criteria for preferred agents in the class:
ENBREL (etanercept)	ACTEMRA (tocilizumab) syringe, Actpen	Humira or Enbrel may receive approval for use for FDA-labeled indications.
HUMIRA (adalimumab)	ARCALYST (rilonacept) injection	Cosentyx may receive approval for FDA-labeled indications following trial and failure of Humira (failure is defined as lack of efficacy of a three-month trial, contraindication to
COSENTYX (secukinumab) syringe, pen-injector	CIMZIA (certolizumab) kit	therapy, allergy, intolerable side effects or significant drug-drug interaction).
XELJANZ IR (tofacitinib) tablet	ILARIS (canakinumab) vial	Xeljanz IR may receive approval for ulcerative colitis following trial and failure of Humira (failure is defined as lack of efficacy of a three-month trial, contraindication to therapy,
work	KEVZARA (sarilumab) pen, syringe	allergy, intolerable side effects or significant drug-drug interaction). Xeljanz IR may receive approval with no trial and failure required for rheumatoid arthritis and psoriatic arthritis. Quantity Limits: 2 tablets per day or 60 tablets for a 30 day supply.
	KINERET (anakinra) syringe	artifictis. Qualitity Ellificts. 2 tablets per day of 60 tablets for a 50 day suppry.
	OLUMIANT (baricitinib) tablet	Non-Preferred Agents may receive prior authorization approval for FDA-labeled indications following trial and failure ALL preferred agents (Enbrel, Humira, Cosentyx, and Xeljanz IR) that are
	ORENCIA (abatacept) syringe, clickject	FDA-labeled for use for the same prescribed indication (failure is defined as lack of efficacy of a three-month trial, contraindication to therapy, allergy, intolerable side effects or significant drug-drug interaction). Agents listed below must meet the following additional criteria for approval of that
	OTEZLA (apremilast) tablet	agent:
	RINVOQ (upadacitinib) tablet	Arcalyst (rilonacept): Prior authorization approval will be given for an initial 12 weeks and authorization approval for continuation will be provided based on clinical response.
	SILIQ (brodalumab) syringe	Kineret (anakinra): May receive approval for use for familial Mediterranean fever. Approval for all other indications is subject to meeting non-preferred criteria listed above.
	SIMPONI (golimumab) pen, syringe	
	SKYRIZI (risankizumab-rzaa) syringe, kit	Rinvoq (upadacitinib) may receive approval if meeting non-preferred criteria listed above AND following trial and failure of Olumiant (baricitanib). Failure is defined as lack of efficacy of a three-

	STELARA (ustekinumab) syringe	month trial, contraindication to therapy, allergy, intolerable side effects or significant drug-drug interaction.
	TALTZ (ixekizumab) auto-injector, syringe	Siliq (brodalumab), Skyrizi (risankizumab-rzaa), or Tremfya (guselkumab) may receive approval if meeting non-preferred criteria listed above AND following trial and failure of Otezla (apremilast). Failure is defined as lack of efficacy of a three-month trial, contraindication to therapy,
	TREMFYA (guselkumab) injector, syringe	allergy, intolerable side effects or significant drug-drug interaction.
	XELJANZ XR (tofacitinib ER) tablet	Stelara (ustekinumab): Loading dose administration prior to approval of Stelara for maintenance therapy using the above criteria should be avoided and will not result in an automatic approval of Stelara maintenance therapy. Prior authorization approval may be given for an initial 16
	*for information on IV infused Targeted Immune Modulators please see Appendix P	weeks and authorization approval for continuation will be provided based on clinical response. Stelara IV vial formulation may receive approval under the pharmacy benefit if meeting non-preferred criteria listed above AND if being administered in a long-term care facility or the member's home by a home health provider (initial 16 week authorization may be placed for both IV and subcutaneous formulations at time of Stelara IV vial approval).
		Taltz (ixekizumab): Prior authorization approval will be given for an initial 12 weeks and authorization approval for continuation will be provided based on clinical response.
		Xeljanz (tofacitinib) XR: Approval will require verification of the clinically relevant reason for use of the Xeljanz XR formulation versus the Xeljanz IR formulation in addition to meeting non-preferred criteria listed above.
		The Department would like to remind providers that many products have patient support programs that assist patients in drug administration, education, and emotional support for our member's diseases.
	Therapeutic Drug Class: TOPIC	CAL IMMUNOMODULATORS – Effective 7/1/2020
No PA Required	PA Required	Non-preferred topical immunomodulator products may be approved following adequate trial and failure; of one prescription topical corticosteroid AND two preferred agents.
Pimecrolimus cream - authorized generic only -	ELIDEL (pimecrolimus)	‡Failure is defined as a lack of efficacy with one month trial, allergy, intolerable side effects,
Oceanside Pharm	Pimecrolimus cream - All other manufacturers	contraindication to, or significant drug-drug interactions.
PROTOPIC (tacrolimus) ^{BNR}	Tacrolimus (generic Protopic)	For members under 18 years of age, must be prescribed by or in conjunction with a dermatologist or allergist/immunologist.
		X. Miscellaneous
	Therapeutic Drug Class: E	PINEPHRINE PRODUCTS -Effective 1/1/2020

Therapeutic Drug Class: **NEWER HEREDITARY ANGIOEDEMA PRODUCTS** -Effective 10/1/2019

PA Required for all agents in this class Prophylaxis: Prophylaxis: CINRYZE (C1 esterase inhibitor) 500 HAEGARDA (C1 esterase inhibitor) 2,000 unit and 3,000 unit kit unit vial TAKHZYRO (lanadelumab) 300 mg/ mL vial *Treatment:* Treatment: BERINERT (C1 esterase Icatibant 30 mg/3 mL syringe inhibitor) 500 Unit kit RUCONEST (C1 esterase inhibitor, FIRAZYR^{BNR} (icatibant recomb) 2,100 unit vial acetate) 30mg/3 mL syringe

Medications Indicated for Routine Prophylaxis:

Members are restricted to coverage of one medication for <u>routine prophylaxis</u> at one time. Prior authorization approval will be for one year.

Haegarda may be approved for members meeting the following criteria:

- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, CI-INH level) AND
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND
- Member meets at least one of the following:
 - Haegarda® is being used for short-term prophylaxis to undergo a surgical procedure or major dental work OR
 - Haegarda® is being used for long-term prophylaxis and member meets one of the following:
 - o History of ≥1 attacks per month resulting in documented ED admission or hospitalization **OR**
 - History of laryngeal attacks **OR**
 - History of ≥2 attacks per month involving the face, throat, or abdomen AND
- Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications **AND**
- $\circ\quad$ Member has received hepatitis A and hepatitis B vaccination \boldsymbol{AND}
- Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV

Max Dose: 60 IU/kg Minimum Age: 10 years **Cinryze** and **Takhzyro** may be approved for members meeting the following criteria:

- Member has history of trial and failure of Haegarda®. Failure is defined as lack of efficacy allergy, intolerable side effects, or a significant drug-drug interaction AND
- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, CI-INH level) AND
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND
- Member meets at least one of the following:
 - Cinryze® is being used for <u>short-term prophylaxis</u> to undergo a surgical procedure or major dental work **OR**
 - Cinryze® is being used for <u>long-term prophylaxis</u> and member meets one of the following:
 - History of ≥1 attacks per month resulting in documented ED admission or hospitalization OR
 - History of laryngeal attacks **OR**
 - History of ≥2 attacks per month involving the face, throat, or abdomen
 AND
- Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications **AND**
- Member has received hepatitis A and hepatitis B vaccination AND
- Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV.

Minimum age: Cinryze: 6 years Takhzyro: 12 years

Max dose:

Cinryze: 100 Units/kg

Takhzyro: 300mg every 2 weeks

Medications Indicated for Treatment of Acute Attacks:

Members are restricted to coverage of one medication for <u>treatment of acute attacks</u> at one time. Prior authorization approval will be for one year.

Firazyr may be approved for members meeting the following criteria:

- Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, CI-INH level) AND
- Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND
- Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications

Minimum age: 18 years

	T	M. ' 1 20
		Maximum dose: 30mg
		Berinert may be approved for members meeting the following criteria: Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, CI-INH level) AND Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND Member has received hepatitis A and hepatitis B vaccination AND Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV Minimum age: 6 years Max dose: 20 IU/kg
		Ruconest may be approved for members meeting the following criteria: Member has a history of trial and failure of Firazyr® OR Berinert®. Failure is defined as lack of efficacy, allergy, intolerable side effects, or a significant drug-drug interaction AND Member has a diagnosis of HAE confirmed by laboratory tests obtained on two separate instances at least one month apart (C4 level, CI-INH level) AND Member has a documented history of at least one symptom of a moderate to severe HAE attack (moderate to severe abdominal pain, facial swelling, airway swelling) in the absence of hives or a medication known to cause angioedema AND Member is not taking medications that may exacerbate HAE including ACE inhibitors and estrogen-containing medications AND Member has received hepatitis A and hepatitis B vaccination AND Provider attests to performing annual testing or screening (as appropriate) for HBV, HCV, and HIV. Minimum age: 13 years Max dose: 4200 Units/dose
	Therapeutic Drug Class	: PHOSPHATE BINDERS - Effective 7/1/2020
No PA Required	PA Required	Prior authorization for non-preferred products in this class may be approved if member meets all the
Calcium acetate capsule	AURYXIA (ferric citrate)	 following criteria: Member has diagnosis of end stage renal disease AND Member has elevated serum phosphorus [> 4.5 mg/dL or > 1.46 mmol/L] AND
PHOSLYRA (calcium acetate)	Calcium acetate tablet	 Provider attests to member avoidance of high phosphate containing foods from diet AND Member has trialed and failed; one preferred agent (lanthanum products require trial and
Sevelamer carbonate tablet (6-17 years old)*	CALPHRON (calcium acetate)	failure‡ of a preferred sevelamer product).
Sevelamer HCl authorized generic -WINTHROP US only -	FOSRENOL (lanthanum carbonate) chewable tablet, powder pack	 Auryxia (ferric citrate) may be approved if the member meets all the following criteria: Member is diagnosed with end-stage renal disease, receiving dialysis, and has elevated serum phosphate (> 4.5 mg/dL or > 1.46 mmol/L). AND

RENVELA Sevelamer conservations Sevelamer Hamanufacture	(Sevelamer HCl) (sevelamer carbonate) arbonate powder pack HCl tablet -all other ers D (sucroferric oxide)	prescribed for hyperphosphatemia in end stage renal disease OR • Member is diagnosed with chronic kidney disease with iron deficiency anemia and is not receiving dialysis AND • Member has tried and failed‡ at least two different iron supplement product formulations (OTC or RX) Velphoro (sucroferric oxyhydroxide tablet, chewable) may be approved if the member meets all of the following criteria: • Member is diagnosed with chronic kidney disease and receiving dialysis, and has elevated serum phosphate (> 4.5 mg/dL or > 1.46 mmol/L). AND • Provider attests to counseling member regarding avoiding high phosphate containing foods from diet AND • Member has trialed and failed‡ two preferred agents, one of which must be a preferred sevelamer product Maximum Dose: Velphoro 3000mg daily Grandfathering: Members currently stabilized on a non-preferred lanthanum product may receive approval to continue therapy with that product. ‡Failure is defined as lack of efficacy with 6 week trial, allergy, intolerable side effects, or significant drug-drug interaction. Note: Medications administered in a dialysis unit or clinic are billed through the Health First
